

**SURGE SUPPRESSION SERVICE
 SCHEDULE 90**

AVAILABILITY

Available for single phase connections that are directly metered and are served at less than 250 volts. Surge suppression equipment consists of a base unit that is attached to Customer's service between the meter and meter socket and may include one or more surge suppression "plug" strips for indoor use. Equipment may also include special surge suppression devices for use with communication and CATV and digital satellite systems (DSS). Connection must be directly metered (i.e., not utilizing metering transformers). The meter and meter socket must be sufficiently accessible for installation of the surge suppression equipment. Company reserves the right to decline surge protection service to Customers with hazardous or substandard service entrances.

MONTHLY RATES FOR SURGE SUPPRESSION SERVICE

	Distribution	Transmission	(C)	ITC/ITC-2(C)	Generation
Base unit	\$4.83	\$0.00		\$0.00	\$0.00
One plug strip with telephone or coax connector	\$2.13	\$0.00		\$0.00	\$0.00
Additional plug strips	\$2.13	\$0.00		\$0.00	\$0.00
Satellite unit (DSS).....	\$2.64	\$0.00		\$0.00	\$0.00
Each additional DSS strip	\$2.64	\$0.00		\$0.00	\$0.00

Tax Adjustment Surcharge

The Tax Adjustment Surcharge included in this Tariff applies to charges under this Schedule.

Late Payment Charge

The above net rates apply if the current bill is paid in full within 20 days of the date of such bill and if all previous undisputed bills have been paid in full. A late payment charge of 1.25% per month of the unpaid balance of a bill will be made for failure to make payment in full by the due date. These charges are to be calculated on the overdue portion of the bill only. Such interest rate when annualized shall not exceed 15% simple interest per annum. A late payment charge on a disputed bill may be reduced or eliminated by the Company, or upon order by the Commission, to facilitate payment by the disputing Customer.

TERM

One year for meter socket protection equipment and strip surge protection equipment.

GENERAL

Company will install all meter base unit surge suppression equipment. Other surge suppression equipment (plug-in strip suppression equipment) will be mailed to Customer within four to six weeks. Detailed installation instructions and assistance, where needed, will also be provided by Company. All surge suppression equipment listed above is warranted against damage by the manufacturer under specific circumstances. Customer's equipment protected by surge suppression equipment is also warranted against damage within published limits. Customer must comply with installation instructions (including grounding requirements) to activate warranty.

(C) Indicates Change

Concluded on Page No. 33-2

WEST PENN POWER COMPANY

**SURGE SUPPRESSION SERVICE
SCHEDULE 90 (Concluded)**

Should Customer wish to terminate use of surge protection service, Customer will notify Company of his intent. Company will remove equipment and cease billing for the service upon removal of the base unit and receipt of any Company owned plug strip surge suppression equipment from Customer's premises.

Customer must meet credit standards.

Plug-in strip surge suppression equipment will also include a six (6) foot length of phone cord or coaxial cable (as appropriate.)
