

WEST PENN POWER COMPANY

OPPORTUNITY POWER RIDER

AVAILABILITY

(C)

This Rider is available only to locations now served hereunder and to locations for which definite rate commitments have been made as of December 31, 1998 for Customers upon executed agreement, on Primary Power Service Schedules 40, 41, 44 or 46 or General Power Service Schedule 30, when in Company's sole judgement, adequate electrical facilities are in place to serve Customer and Customer has short term opportunity to increase production. Opportunity Power supplied under this Rider is interruptible for emergency and maintenance purposes and for generation and transmission deficiencies and peak shaving. Opportunity Power shall be scheduled (in kilowatts (kW) or kilovolt-Amperes (kVA) to conform with applicable Rate Schedule) at a minimum level of 2,000 kVA or kW and in 1,000 kVA or kW increments thereafter. Not more than eight levels of Opportunity Power may be scheduled in any billing month. Opportunity Power shall be provided and billed in addition to the power provided under terms of the Primary Power Service or General Power Service Electric Service Agreement. Except as provided below, all other contracted billing provisions and all other provisions of the applicable Rate Schedule shall apply. Opportunity Power is not available to provide standby or maintenance service for alternative generation systems. Sales under this rider shall not be subsidized by sales under any other schedule or rider.

MONTHLY RATE

Determination of Opportunity Power Demand

The Opportunity Power Demand for billing purposes shall be the Opportunity Power Demand scheduled in advance, prorated on a daily basis, for the billing month. Daily proration rate is 4 percent per day or part thereof, not to exceed 100 percent per billing month. Proration shall be applied to scheduled Opportunity Power Demands in descending order of magnitude. In the event that Company requests interruption of Opportunity Power, the daily proration shall be adjusted based on the hours of interruption on a nearest whole hourly basis. Proration of Opportunity Power Demand ceases with the first full 15-minute clock interval beginning at least ten minutes after notification of Opportunity Power interruption. Thereafter, until Company notifies Customer that the interruption has ended, Opportunity Power Demands, if not interrupted, shall be billed under the terms of the rate schedule without proration. When notified at the end of the interruption, Customer may decline to reestablish Opportunity Power purchase, assuming Customer interrupted when notified. Proration will exclude the balance of the day if Customer declines to reestablish purchase. The Opportunity Power demand shall be added to the Customer's Kilowatt Demand to be billed in accordance with the applicable Rate Schedule. Each day of Opportunity Power purchase shall be billed in the billing period during which that day ended. Unless Customer fails to interrupt opportunity power purchase when requested to do so, opportunity power will not affect the minimum billing demand of any succeeding billing period.

Energy Charge.

Energy consumed under the provisions of this Rider shall be included in the energy billing in accordance with the applicable Rate Schedule.

CONDITIONS

All Opportunity Power supplied under this rider shall be made available to Customers solely at the Company's discretion, based on availability, and shall be interruptible, upon 10 minutes notice for emergency and maintenance purposes and for generation and transmission deficiencies and peak shaving. Customer shall install and maintain or cause to be installed and maintained an adequate means of communication to be used for the purpose of Company's notifying Customer when interruptions of the power provided under this Rider are to occur.

WEST PENN POWER COMPANY

OPPORTUNITY POWER RIDER (Concluded)

Buy-through Provision

When Customer is informed that Opportunity Power is not otherwise available, or when Company requests that Customer interrupt an Opportunity Power purchase, and when Company has sufficient generating and transmission capacity available either from owned facilities or firm capacity plus energy purchases from other utilities, and Customer notifies Company of desire to continue opportunity power purchase, Company may at its sole discretion elect to allow Customer to continue purchasing Opportunity Power, provided Customer agrees to pay \$0.079 per kWh. Company may interrupt delivery of such a continued purchase, if required, due to a local or other emergency condition in order to maintain service to firm service Customers.

TERM

As provided in the executed agreement.
