 Vice President

Effective: January 1, 2003

## **RULES AND REGULATIONS FOR ELECTRIC SERVICE**

The following Rules and Regulations for Electric Service shall be deemed a part of each schedule of rates now or hereafter published by Monongahela Power Company and every contract for the furnishing of electric service by the Company shall be deemed to include all of the terms and conditions of these Rules and Regulations.

Rules and Regulations for Electric Service set forth hereinafter and the qualifications thereto by certain rate schedules are supplementary to the "Rules and Regulations for the Government of Electric Utilities" established by the Public Service Commission of West Virginia, and all amendments and modifications thereto hereinafter made by said Commission. Nothing in these supplementary Terms and Conditions shall be interpreted as divesting the Commission or any appropriate court of any of the jurisdiction delegated to it by law.

### **DEFINITIONS**

Certain words when used in contracts, schedules, and Rules and Regulations for Electric Service of the Monongahela Power Company shall be understood to have the meaning set forth in this paragraph, viz:

(a) "Commission" -- the Public Service Commission of West Virginia.

(b) "Commission Rule" -- "Rules and Regulations for the Government of Electric Utilities" established by the Public Service Commission of West Virginia.

(c) "Company" is understood to mean the Monongahela Power Company.

(d) "Customer" is understood to mean any person, group of persons, firm, corporation, institution, municipality or other service body receiving and using electric service supplied by the Company through a service connection.

(e) "Month" is the period between two monthly meter readings, taken as nearly as practicable on the same date each calendar month as selected by the Company.

(f) "Operation" is understood to mean a single enterprise conducted by a customer where all of said enterprise is prosecuted as one unit.

(N) (g) "Point of Service": The point of connection between the Distribution System of the Company and the electric system of the Customer .

(C) (h) "Service" is understood to mean any electric energy or service which the Company may supply, or any duty or obligation which may be performed by it.

(C) (i) "Service Connection" is understood to mean each connection through which the Company furnishes any electric service to the customer.

### **1. CHARACTER OF ELECTRIC SERVICE**

Unless otherwise specially agreed upon, the Company will furnish single or three-phase, sixty-cycle alternating current.

(N) Denotes New  
(C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 07-1170-E-T, dated December 30, 2008

Issued: February 12, 2009

Issued by  
D. W. McDonald  
Vice President

Effective: January 29, 2009

## **RULES AND REGULATIONS FOR ELECTRIC SERVICE**

### **2. APPLICATION**

(a) A copy of the rates, and Rules and Regulations under which service is to be rendered will be furnished to the customer upon request. The Company will provide an explanation of rates in accordance with Commission Rule 4.1(2).

(b) A written application may be required from each customer under the rates so selected by him, which application, when duly accepted by the Company, shall constitute a contract between the customer and the Company. Use of electric service shall obligate the consumer to pay for the service used regardless of whether an application has been made and signed.

(c) An Electric Service Agreement when properly executed on the part of the Company and customer will constitute a contract between the customer and the Company.

(d) Customers desiring service shall make application to the office of the Company before commencing the use of the service, and will be charged for all service rendered from and including the day of commencing such use. A contract for electric service is not transferrable without written consent of the Company. The customer shall give the Company three days written notice, unless otherwise provided for, in advance of intended discontinuance of service and/or removal from the premises, and in the event of failure to do so will be liable for payment for all service rendered up to the time the Company receives notice of the customer's discontinuance of service. Requests to commence or discontinue service made by telephone will be honored unless, at the time of the telephone request, the Company representative specifically advises the customer to make such request in writing.

### **3. DEPOSITS**

(C) The Company may require any applicant or customer to make a deposit with the Company initially and from time-to-time as a guarantee of payment for electric service used. Residential customer deposits required after March 12, 1983 shall not exceed one-twelfth (1/12) of the customer's estimated annual charge. Nonresidential customer deposits required after March 12, 1983 shall not exceed one-sixth (1/6) of the customer's estimated annual charge. The Company shall not be required to supply electricity until the deposit has been paid, and it may terminate service if the deposit or any increase thereof is not paid when required. After a customer has paid bills for service without a delinquency for a period of twelve (12) consecutive months, the Company shall promptly refund any deposit made by such customer prior to such period plus accrued interest thereon. Simple interest will be paid at the end of said period or at the day of discontinuance of service on any deposit which had remained with the Company for a period of six months or longer. Such interest shall be equal to the average one-year treasury constant maturities for September, October and November of the preceding year (rounded to the nearest ½ percent) in effect at the time the deposit is refunded. For purposes of this Rule, calculation of the twelve consecutive months period shall commence from the first regular payment or, in the event of payment of a delinquent bill, from such latter date. The Company shall have a reasonable time in which to read and remove its meters and to ascertain that the obligations of the customer have been fully performed before refunding any deposit.

(C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case Nos. 06-0960-E-42T and 06-1426-E-D, dated May 22, 2007

Issued: June 1, 2007

Issued by  
D. E. Flitman  
President

Effective: May 23, 2007

## **RULES AND REGULATIONS FOR ELECTRIC SERVICE**

### **4. RIGHT-OF-WAY**

The facilities of the Company by which service shall be furnished to the customer shall be located on or over easements which shall provide a route deemed by the Company to be the most suitable for the furnishing of such service. In consideration of the furnishing of service by the Company, the customer shall cause such rights and easements to be provided the Company on or within property to be served as the Company shall deem necessary and convenient to permit the construction, operation and maintenance of the Company's facilities required to serve the customer. It shall not be the obligation of the Company to acquire any right or easement on or over property of another necessary for the furnishing of service to the customer for which acquisition the Company does not have the right of eminent domain.

### **5. SERVICE CONNECTIONS**

- (O) The Company will make the necessary connection from its lines to the wire entrance of the customer's building, which connection is  
(O) to be placed at a location harmless to the public and convenient to the lines of the Company. The Company shall not be obligated to connect service to be used in or in connection with a building or structure located in whole or in part on any property or easement of the Company.

### **6. METER CONNECTIONS**

The Company will furnish and connect the necessary metering apparatus for measuring service to the customer. The customer is to provide a suitable meter location so the meter may be conveniently read, inspected and tested. Prior to connection of service by the Company, the customer shall furnish and install, and shall thereafter maintain at all times, a ground connection in compliance with the requirements of the National Electrical Code as the same may be amended from time to time.

### **7. CUSTOMER'S RESPONSIBILITIES**

(a) The Company is in no way responsible for damages arising from any error or defect in wiring of the customer. All wiring is to be in accordance with the regulations of the National Electrical Code or any state or municipal authority having jurisdiction.

(b) The Company shall have the right at all reasonable hours to enter the premises of the customer for the purpose of installing, removing, reading, testing, replacing or otherwise disposing of its apparatus and property, and the right of entire removal of the Company's property in the event of the termination of the contract for any cause.

(O) Denotes Omission

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 07-1170-E-T, dated December 30, 2008

Issued: February 12, 2009

Issued by  
D. W. McDonald  
Vice President

Effective: January 29, 2009

### **RULES AND REGULATIONS FOR ELECTRIC SERVICE**

(c) The customer is to install only such motors or other apparatus or appliances as are suitable for operation with the specific character of service supplied by the Company, and which will not be detrimental to same and the electric service is not to be used in such a manner as to cause unprovided-for voltage fluctuations or disturbances in the Company's distribution system. The Company will be the judge as to the suitability of apparatus or appliances to be connected to its lines, and as to whether the operation of such apparatus or appliances will be detrimental to its general service; subject to determination by the Public Service Commission of West Virginia in case of controversy.

(d) A customer shall not increase its power requirements to exceed the service capacity for which customer contracts without the prior written consent of the Company. If the Company consents to any such increase, said service capacity shall be increased to an amount equal to the increased power requirements to which the Company so consented. Should the customer increase its power requirements above the amount of power requirement contracted for or the amount of power requirement consented to by the Company, the customer shall be responsible for, and indemnify the Company against, any losses, damages or injuries sustained by the Company or others resulting therefrom, and all claims therefor.

#### **8. NO RESALE**

It is expressly understood and agreed that the electric service to be delivered by the Company to the customer is not to be resold for any purpose unless the customer is engaged in the business of distributing electric energy as a public utility.

#### **9. BILLING AND PAYMENTS**

(C) (a) Bills for service will be rendered by the Company to the customer at regular intervals of one month in accordance with the rate selected applicable to the customer's service. When meters are read at intervals of more than one month, bills for the initial months of the interval may be estimated based upon a reasonable process that includes weather as a factor. The bill for the final month of the interval will be calculated from the metered use during the interval corrected for the amount of estimated use previously billed. Bills are payable at the main office or any of the collection offices of the Company, or other places designated by the Company. Customers not receiving their bills at the usual time should make inquiry of the Company in order to avoid a late payment charge as the Company does not permit an extension of the payment period because of the failure to receive the bill. When payment of a bill is sent by United States mail, the late payment charge will be avoided if that such payment contains a legible postmark as evidence that payment was mailed on or previous to the last day of the payment period. In the absence of such postmark, a bill will be considered paid on the date of its receipt by the Company.

(b) In the event of the stoppage of a meter or the failure to register the correct amount of current consumed by reason of either a fast or a slow meter, the customer will be billed or refunded for such period in accordance with Commission Rule 4.4 - Adjustment of Bills or Rule 3.1(3) - Waste or Fraud.

### RULES AND REGULATIONS FOR ELECTRIC SERVICE

- (C) (c) Permanent residential nonseasonal customers may elect to pay their bills under the Company's Average Payment Plan. The Average Payment Plan provides for bills to be rendered monthly based upon 1/12 of the customer's latest twelve months' usage. If there is no twelve-month usage history available for the customer, then an estimated amount will be used. Any difference between the average payments and the actual charges for the twelve-month average payment period at its anniversary will be amortized over the next twelve-month period. If a participant in the Average Payment Plan fails to make two or more consecutive monthly payments, the Company shall have the option of terminating that customer's participation in the plan.

Nonresidential customers who are billed under the Uniform Payment (Budget) Plan on the effective date hereof may continue to be billed under the Uniform Payment (Budget) Plan or may elect to be billed based on actual usage.

- (C) (d) Company may, at its option, read meters and compute bills in units of ten kilowatt-hours for residential and small commercial customers, and in units of ten kilowatt-hours or larger where required by meter design or use of instrument transformers.
- (C) (e) The Company will only accept Customer-supplied meter readings at the end of each initial month of a meter reading interval longer than one month by telephone, through the Company's internet website, or by meter dial card which will be supplied to the Customer upon request. If the Customer-supplied reading is received by the Company during the three days immediately preceding the scheduled read date of such month, the bill for such month will be computed from the Customer-supplied meter reading instead of by estimate. The Company will adjust estimates of bills for changes in conditions of which it has been notified in advance by a Customer.
- (C) (f) All rates of the Company for electric service are subject to the approval of the West Virginia Public Service Commission and may be changed from time to time as approved by such Commission or as otherwise permitted by law.
- (C) (g) The Company's Bill Extender Program is available on application to residential customers receiving monthly Federal Retirement, State Retirement, Railroad Retirement, or Social Security benefits. Under the Bill Extender Program, bills dated after the fourth day of each month will not become past-due until the fifth day of the following month, but in no case less than 20 days from the date billed. By choosing the Bill Extender Program, the customer agrees to pay bills monthly under the Average Payment Plan described in Section 9, Paragraph (c) of these Rules and Regulations.
- (C) (h) The Company may, after notice to the Commission in each case, require weekly or bi-weekly payment for service by a nonresidential customer in unusual situations when the Company, upon investigation, believes the customer's ability to pay for service may be impaired and that a shortened payment period is necessary to protect the Company and its other customers from loss.
- (C) (i) If the Company receives a negotiable instrument from an Applicant or Customer as payment of any bill, charge, or deposit due, and if such instrument (including electronic payment) is subsequently dishonored or is uncollectible for any reason, the Company may charge the Applicant or Customer a processing fee of Fifteen Dollars (\$15.00) or the actual processing fee incurred by the Company, whichever is less.
- (C) (j) Final billed accounts with credit balances of less than \$1.00 shall be refunded only upon request of the Customer.

### 10. SUSPENSION OF MINIMUM MONTHLY PAYMENT

Should the customer be prevented from receiving during any period all or any portion of the electric service contracted to be furnished, by reason of fire, explosion, flood, riot, or

(C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case Nos. 06-0960-E-42T and 06-1426-E-D, dated May 22, 2007

Issued: June 1, 2007

Issued by  
D. E. Flitman  
President

Effective: May 23, 2007

### RULES AND REGULATIONS FOR ELECTRIC SERVICE

- (O) war, then the applicable minimum monthly payment required for such period may, upon written application by the customer, be suspended, but such suspension shall not exceed three months during any contract year.
- (N) Should the customer be prevented from receiving, for seven consecutive days or more, all or any portion of the electric service contracted or agreed to be furnished due to the failure or inability of the Company to deliver such service, then the minimum charge shall be waived for that monthly billing period.

#### 11. FAILURE TO PAY

- (C) If the customer shall fail to make payment for any service rendered by the Company after payment is due, the Company shall have the right either (1) to cancel the service contract-in which event the minimum payments as provided in the schedule for the unexpired term of the contract shall thereupon become payable to the Company as liquidated damages-or, (2) at the Company's option, to discontinue service
- (C) until all payments due from the customer shall have been made. However, any customer which has been assessed liquidated damages pursuant to option (1) shall be entitled to a credit or refund for a pro rata portion of such liquidated damages if the customer is reconnected during the unexpired term of the contract, or if a new customer is connected at the same location. The proration herein provided shall consider both the number of months remaining to the end of the contract of the customer paying the liquidated damages and the minimum bill established for the reconnected or new customer.

#### 12. EMERGENCIES

The Company will use reasonable diligence in furnishing continuous electric service, but the Company shall not be liable for any loss, damage or expense sustained by the customer caused by interruption, deficiency, variation or other failure of electric services caused by any acts of God, public enemies, accidents, fuel shortages, labor disputes, riots, wars, orders or acts of civil or military authority, breakdowns of or damage to equipment or facilities of the Company, or any cause other than gross negligence or willful neglect on the part of the Company.

The Company may, without liability therefor, interrupt or suspend service to any or all of its customers whenever, in its sole judgment, such action is required to limit or prevent any actual or threatened disturbance or instability on the electric system of the Company or any interconnected system.

#### 13. INTERRUPTION AND DISCONTINUANCE OF SERVICE

The Company reserves the right to shut off the supply of electric service for any of the following reasons: (1) repair, maintenance, alteration, or extension of Company facilities; (2) enforcement of air quality, water quality or other environmental standards; (3) fraudulent representation or other illegal act by customer in the procurement, use or measurement of

(O) Denotes Omission  
(N) Denotes New

### **RULES AND REGULATIONS FOR ELECTRIC SERVICE**

electric service; (4) use of electric service in violation of these Rules and Regulations; (5) any disapproval by Company of the customer's equipment or installation by virtue of its being or becoming defective or otherwise unsafe or objectionable; (6) customer's premises have been abandoned or are in such condition as to create a hazard to service facilities or to persons on or about such premises; (7) placement or maintenance by customer of any building or structure which in the opinion of the Company constitutes a hazard to service facilities or to persons; (8) flooding or threatened flooding of customer's premises constitutes a hazard to service facilities or to persons; (9) failure by customer to comply with the requirements of the National Electrical Code; (10) nonpayment of any bill, as herein provided; (11) customer's violation of or non-compliance with any Rule or Regulation of or on file with the Commission; (12) whenever such action is necessary to protect the Company from fraud, theft or abuse; (13) upon cancellation of service contract by the Company; or (14) at the request of the customer.

Customers whose service is scheduled for disconnection for reasons (3), (4), (10), (11), (12) and (13) shall be notified in writing by mail or delivery to the service location by the Company not less than ten days before such disconnection and, unless the Company reasonably concludes that the premise is not permanently inhabited, the Company shall make a personal contact, face-to-face or by telephone, with the customer or an adult member of the household not less than twenty-four hours before such disconnection. The customer may notify the Company prior to the date of scheduled disconnection that (a) a portion of the bill is in dispute, (b) the customer is being charged for service not rendered, (c) any information resulting in the Company's decision to discontinue service is erroneous, or (d) that the customer is unable to pay for such service in accordance with the requirements of the Company's billing or is able to pay for such service but only in installments, and that termination of service would be especially dangerous to the health or safety of a member of the customer's household. Upon such notification, the Company shall provide the customer with an opportunity to present such complaint to an employee authorized to resolve the dispute. The customer shall have seven days to appeal the Company's decision to the Commission. Any amount not in dispute must be paid by the customer in order to protect his rights. Reason (d) above shall not entitle nonresidential customers to delay of scheduled termination of service. The Company may request a waiver from the Commission where operation of a provision of Rule 4.8 of the Commission's Rules and Regulations for the Government of Electric Utilities will result in undue hardship to the Company. The Company shall keep a record of the conditions resulting in termination for reasons (5), (6), (7) and (9), shall inform the customer of the conditions necessary for restoration of service and shall make a reasonable effort to notify the customer prior to termination. The Company may terminate service without notice when, absent such termination, a condition hazardous to life or property would exist.

(N) The employees of the Company shall not be required to accept payments at the Customer's premises in lieu of disconnecting service for non-payment. In lieu of payments being tendered at a Customer's premise, a Customer shall be afforded no less than one (1) hour in which to remit payment using an authorized electronic payment service or at authorized collection agencies of the Company. If the Customer fails to make the required payment, the Company may proceed to disconnect service.

#### **RECONNECTION CHARGE**

When the service has been discontinued for any of said reasons other than (1), (2) and (8), a charge to the customer, payable before reconnection, will be made. When service has been discontinued at the customer's request, however, the reconnection charge shall apply only when the customer requests that service be reconnected at the same location within eight (8) months from the date that service was disconnected. The reconnection charges are as follows:

(N) Denotes New

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case Nos. 06-0960-E-42T and 06-1426-E-D, dated May 22, 2007

D. E. Flitman  
President

Effective: May 23, 2007

**RULES AND REGULATIONS FOR ELECTRIC SERVICE**

Straight time (normal working hours).....	\$17.50
Overtime - Callout evenings or Saturdays.....	57.50
Overtime - Callout Sundays.....	72.50
Overtime - Callout Holidays.....	87.50

If an installment payment plan for the payment of a customer's delinquency is appropriate, the requirement for the advance payment of the reconnection fee shall not apply and any reconnection fee may be a part of such installment payment plan.

Absent a bona fide emergency, the Company shall not be required to make reconnection of service after dark, pursuant to a waiver of Commission Rule 4.8.1.a.F.

**INTERRUPTION OF SERVICE**

If service is interrupted for reasons (1) and (2) for any long duration, Company shall notify, insofar as is practical, every customer affected by such interruption. Company shall not be required to give such notice for interruptions due to emergencies, accidents, the elements, public enemies, strikes or orders of court, governmental commissions or agencies which are beyond the control of the utility.

**14. CANCELLATION OF CONTRACT**

In case of any act of receivership or bankruptcy by or against the customer, the contract shall, at the option of the Company, cease and terminate, and all claims for service previously delivered shall become forthwith due and payable.

**15. EXTENSION OF COMPANY'S FACILITIES**

(O)  
(C)

The extension of the Company's distribution facilities for supplying electric energy either overhead or underground to a Customer or group of Customers will be made under the provision of Rate Schedule "LE" subject to any applicable rules of the Public Service Commission, provided that the Company reserves the right to refuse to make an extension of its facilities, or to reinforce its facilities, or to take title to and assume responsibility for the future maintenance and replacement of facilities built by another and offered to the Company, when by so doing the Company is required to assume an unusual financial risk or burden, or is required to introduce a hazard to the service of other Customers, or incur extraordinary losses of electric energy or to suffer excessive operating, maintenance and replacement costs

**RULES AND REGULATIONS FOR ELECTRIC SERVICE**

16. PROMISES

No inspector, agent or other employee of the Company has authority to make any promises, agreements or representations not included in the rate schedules, Rules and Regulations, and form of contract on file with the Public Service Commission.

17. SERVICE FOR PERIODS LESS THAN THOSE SPECIFIED IN RATE SCHEDULES

A. Initial Term

A new customer taking service at the location of a previous customer shall be responsible for an initial term contract that is no longer than the remaining term of the previous customer's contract. Provided, however, that should the Company be required to make an investment in permanent facilities to serve the new customer, this provision may be subject to modification, or conditioned upon an appropriate agreement to assure reasonable compensation for such investment.

(O)  
(C)

B. Governmental Bodies and Agencies

When a governmental body or agency is prohibited by law from entering into an agreement for the term specified by an otherwise applicable rate schedule, the Company will accept an agreement with such governmental body or agency under such rate schedule for less than the term specified therein, but in no case less than one year, provided that said agreement shall

### **RULES AND REGULATIONS FOR ELECTRIC SERVICE**

continue in force thereafter for successive periods of like term until written notice of cancellation has been given by either party to the other twelve (12) months prior to any expiration date and such time has expired, and further provided, in the Company's opinion, the use of service under such agreement can be expected to continue for not less than the minimum term specified by the applicable rate schedule.

#### **18. LOCAL TAX ADJUSTMENT**

When the Company is or becomes liable to any municipal corporation, or other tax levying corporation, or political subdivision of the State, for any license tax, excise tax, privilege tax, use tax, franchise fee or tax, or other like tax, based upon the amount of electric service sold or revenues received by the Company within the territorial limits of such corporation or political subdivision, or based upon the number of poles, meters or other utility property units owned or used by the Company within such territorial limits; or for any other tax, fee or service charge, which other tax, fee or service charge is not imposed upon all other businesses at substantially the same rate; then the amount of such tax, fee or charge shall be added, pro rata, to the bills to customers of the Company for electric service rendered within such territorial limits, including compensation for the additional state gross receipts tax resulting therefrom; provided however, that a franchise fee or franchise tax based upon the number of poles owned or used by the Company within such territorial limits shall not be so added to the bills of customers when such fee or tax is not in excess of one dollar (\$1.00) per pole per year.

- (N) Adjustments in bills will be made by adding to each bill, as determined by application of the appropriate rate schedule, a local tax surcharge computed as a fraction of such bill. Whenever the local and/or state tax is levied as a percentage of revenues, the fraction to be added shall be calculated by dividing the local tax rate, expressed as a decimal, by one minus the sum of the local and state tax rates, both expressed as decimals.

There is first filed, coincidentally with the filing of this Rule, a statement (see Sheet No. 5A) showing a list of cities and towns levying taxes subject to this Rule, and the local tax surcharge, expressed as a decimal fraction, which will be added to the bills to customers in order to compensate for such taxes. Whenever a change or changes occur in such tax rates, a revised statement will be filed with the Commission as soon as practicable after the Company has been notified that such new or changed rates will be applied.

#### **19. IMPOSED RELOCATIONS OR UNDERGROUNDING**

- (N) When Company is required by any political subdivision of the State or the United States, or any agency thereof, to place new facilities underground, or to relocate existing facilities underground, or to otherwise relocate existing facilities, and the Company has not been otherwise compensated, the cost of such placement or relocation shall be recovered by Company in the manner hereinafter provided.

- (N) Denotes New

**RULES AND REGULATIONS FOR ELECTRIC SERVICE**

The political subdivision or agency which imposes the requirement for relocation or undergrounding should pay the adjusted cost thereof in advance. In the absence of such payment, Company may recover, within a period of five years, such adjusted cost by means of a surcharge applied upon the bills of all customers whose electric service delivery points are situated within the political subdivision.

(N) 20. COMPLAINT (ELECTRIC RULE 6.7.) and REQUEST (ELECTRIC RULE 6.8.) METER TESTS

(a) The Company shall provide one free meter test during any 24 month period for any Customer requesting same. For each additional test requested during such period, the Customer shall be required to deposit with the Company a deposit of \$30.00 for a single-phase meter or \$35.00 for a poly-phase meter to offset the cost of such test. If any such additional meter test made during the aforesaid period reveals meter registration that is greater than 102%, the deposit required herein shall be refunded; otherwise, the deposit shall be retained by the Company to offset the cost of such test.

(b) Should the meter test be performed pursuant to Commission Electric Rule 6.7. Complaint Test, the Company will test the meter at the direction of a Commission representative.

(c) For either type of test, the Customer, or his representative, may be present when the meter is tested.

(d) A written report of the results of the test shall be made to the Customer within 10 days after completion of the test. The complete original records of the test shall be kept on file by the Company for a period of 5 years.

(e) If, as a result of any test, the meter is found to be in error by more than 2%, or not registering, billing adjustments will be made pursuant to Commission Rule 4.4. Adjustment of Bills.

<u>Worthington</u>	=	=	=	=	(e) .02

- NOTES:
- (a) Surcharge rates are computed as follows, with exceptions indicated in (b) and (c):  

$$\text{Surcharge Rate} = \frac{\text{Local Tax Rate}}{1 - \text{Local Tax Rate}}$$
  - (b) This tax is not PSC jurisdictional. Municipalities will be added or deleted, or rates changed, to remain in compliance with applicable municipal ordinances. Tariff sheet will be revised when changes are made to PSC jurisdictional rates.
  - (c) Rate equivalent to current optional annual payment provided in tax ordinance.
  - (d) Ordinance rate adjusted for annual credit.
  - (e) Excise tax maximum per customer for one month based on \$20,000 revenue or \$400 tax.
  - (f) Excise tax maximum per customer for one month based on \$500 revenue or \$10 tax.
  - (g) Excise tax maximum per customer for one month based on \$15,000 revenue or \$300 tax.
  - (h) Local tax surcharge is excluded from this tax.

**FRANCHISE TAX SURCHARGE**

The monthly charges shall be changed to \$0.00 per kilowatt-hour for recovery of the West Virginia Franchise Tax.

Issued: November 27, 1996  
Name change made September 1, 1996

Issued by  
J. S. Pifer  
President

Effective: August 1, 1988

**REDUCED RATE RESIDENTIAL SERVICE RIDER  
"SRRRS RIDER"**

In accordance with General Order No. 214.4 of the Public Service Commission of West Virginia, effective April 4, 1984, Residential Rate Schedule "A" shall be reduced by 20% for service rendered during the months of November, December, January, February and March to a residential customer who qualifies as one of the following:

- A. Recipient of Social Security "Supplemental Security Income" (SSI) or
- B. Recipient of "Aid to Families with Dependent Children" (AFDC) or
- C. Recipient of "Aid to Families with Dependent Children - Unemployed" (AFDC-U) or
- D. Recipient of "Food Stamps" and 60 years of age or older.

The burden of proving eligibility for service under the "SRRRS Rider" shall be on the customer requesting such service. In determining whether an applicant is eligible to receive special reduced rates, the Company is entitled to rely on the information which is provided to it directly or indirectly by the West Virginia Department of Human Services.

Said reduced rate shall apply only to current customers or to those persons who subsequently become customers in their own right. If a recipient is living in a household which is served in the name of a nonrecipient, that service may not be changed to the name of the recipient in order to qualify for the reduced rate service.

The Company shall use due diligence to reflect the special reduced rate charges on bills rendered to its eligible customers. However, the Company shall not be required to alter the timing of its meter reading or billing schedules, but may make adjustments to subsequent bills to reflect the effects of a customer beginning, continuing, or ceasing to be entitled to receive service under the special reduced rates.

This reduced rate shall not apply to residential outdoor lighting tariffs.

The Local Tax Surcharge Rate shall be levied on the bill amount as calculated under this Rider prior to any late payment charges.

LINE EXTENSION PLANS

SCHEDULE "LE"

AVAILABILITY

Service under this schedule is available throughout the entire territory served by the Company.

TERMS AND CONDITIONS GOVERNING EXTENSIONS OF FACILITIES

A. General

1. The extension of the Company's facilities for the supply of electric service to a Customer or a group of Customers requesting such extension will be made in accordance with this schedule.
2. The extension of the Company's distribution facilities, such as pole lines, underground lines, substations and transformers for the supplying of electric energy to a Customer or group of Customers, shall be built by the Company in accordance with its construction standards.
3. In calculating costs pursuant to this schedule, the Customer shall not be charged for any costs over those reasonably necessary to serve the Customer nor be required to share in any elective costs incurred by another Customer. The cost charged to the Customer shall exclude the cost of facilities specified in Commission Rule 5.6. Overhead costs may be added to the total extension cost only as provided for by the Uniform System of Accounts for Electric Utilities.
4. The Company will make application for the permits and acquire the easements necessary to build its supply facilities to the property occupied by the Customer and the Customer will apply for, obtain, and deliver to the Company all other permits or certificates necessary to give the Company the right to connect its conductors to the Customer's wiring and access for all other proper purposes, including a satisfactory easement from the land owner for the Company's facilities on the property occupied by the Customer. The Company shall not be required to obtain permits or to acquire any easement on, over or under the property of another necessary for service if the terms thereof are unduly burdensome. The Company will make a reasonable effort to obtain right-of-way, but when necessary, the Company shall ask the Customer to assist the Company in obtaining right-of-way. The Company and Customer will share equally in the costs of all rights-of-way and crossing permits secured either by purchase or condemnation. The Customer's share of such costs shall be included in the total estimated costs of the extension. Electric service will be supplied within a reasonable time after all necessary permits, certificates and easements have been obtained.
5. When the Customer and/or Company is unable to obtain the best right-of-way consistent with standard engineering practices, the Company shall be required to choose the more economically feasible option of undertaking condemnation or providing service to the Customer by an alternate route.

LINE EXTENSION PLANS

SCHEDULE "LE"

A. General (continued)

6. Any extension financed in whole or in part by Customers will become the property of the Company and every Customer participating in the financing will agree that the ownership of the line extension is vested in the Company.
7. Sale of the premises covered by an agreement in which the Customer has chosen to finance their share of the cost of a line extension through a monthly surcharge shall not relieve the Customer from the terms of that agreement, but the agreement may be assigned to the new Customer upon consent of the new Customer. Provided, however, that should the Company be required to make an investment in permanent facilities to serve the new Customer, this provision may be subject to modification, or conditioned upon an appropriate agreement to assure reasonable compensation for such investment.
8. The Customer shall supply the Company with drawings and specifications covering the plot and buildings to be supplied with service in reasonable time to prepare an electrical layout, make cost estimates and install required facilities.
9. After consulting with the Customer, the Company will determine the location of service facilities, locating the point of origin and termination so as to result in the lowest reasonable construction and operation costs. The Company reserves the right to extend facilities to the closest corner of the Customer's building.
10. Nothing contained herein shall be construed to prohibit the Company from making an extension under different arrangements, providing the foregoing extension rules are fully explained to the Customer, the alternate arrangements are by mutual agreement, and like arrangements are made to other Customers under similar conditions. Such alternate arrangements may include Customer provided work, such as right-of-way clearing, to be performed to reasonable Company specifications. Such arrangements shall not be contrary to Commission's Rule 10.2.
11. Additional details for overhead and underground service installation requirements governing such items as conditions for permanent service, service entrances, and meter installations are in the Company's Commission-approved "Customer Requirements for Electric Service".

B. Underground Service

When the Customer requests and the Company finds it practical to do so, the Company will provide underground service under the following conditions:

1. Underground extension to the Company's distribution system will be located along public roadways which the Company has a legal right to occupy or on public lands and private property across which satisfactory right-of-way or easements may be obtained. The Company shall not be required to provide rear-lot construction to any Customer.

(N) Denotes New

D. W. McDonald  
Vice President

Effective: January 29, 2009

(N)

LINE EXTENSION PLANS

SCHEDULE "LE"

B. Underground Service (continued)

2. The Customer shall, at their expense, clear the underground service route of trees, stumps and other obstructions and must rough grade it to within six inches (6") of final grade before the Company will begin construction. Such clearance and grading must be maintained. If the Customer desires to change the grade at a future date in a manner which requires relocation or change in the Company's facilities, such Customer shall pay the cost of the relocation or change.
3. The Company reserves the right to install overhead facilities when the terrain is unsuitable for standard underground construction equipment such as wet, unstable or rocky conditions or when the final grade level exceeds one (1) foot vertically for each four (4) feet measured horizontally.
4. The Customer shall cooperate with the Company to avoid unnecessary costs. Such cooperation shall include keeping the route of the lines clear of machinery and other obstructions when the line installation crew is scheduled for work.
5. The Company controls the initial and subsequent use of the trench and its backfill. At its option, certain other utilities, such as telephone, CATV and gas, may share the trench. However, water and sewer lines are not permitted to be placed in Company trenches.
6. The Customer shall provide all necessary excavating and backfilling and grading to the Company's underground construction standards and specifications. Such construction standards and specifications will be furnished by the Company on request. Final acceptance of the trench shall be determined by Company personnel prior to installation of Company facilities. If the Company's standards and specifications have not been met, such excavating and backfilling shall be corrected or redone by the Customer. Failure to comply with the Company's construction standards and specifications permits the Company to refuse service until such standards and specifications are met.
7. The Customer shall provide and install, conduit of size specified by the Company, including a 1/4 inch diameter nylon or polypropylene pulling rope, necessary for the Company to install its underground cable.
8. If the Customer changes the plot plan after installation of the Company's lines has begun, or otherwise necessitates additional costs by their act or failure to act, such additional costs shall be borne by the Customer.
9. The Customer shall request electric service in sufficient time so that underground lines may be installed before curbs, pavements and sidewalks are laid.
10. Should the Customer be unable to perform the provisions of Sections B.2, B.6 and/or B.7 on property not owned or controlled by the Customer, the Company may perform the applicable provisions at the Customer's expense.

LINE EXTENSION PLANS

SCHEDULE "LE"

C. Plan A - Residential Line Extension Plan - Primary or Secondary Line Extensions

The provisions of this plan shall apply to construction by the Company of single phase extensions to its distribution system to serve permanent single residential Customers, multi-family dwelling units and residential subdivisions. When an overhead or underground line extension is provided by the Company, the Customer shall pay the following charges. Such charges shall be divided proportionately according to the number of feet used among the Customers initially connected to such extension.

1. Residential Line Extensions less than or equal to 1,000 feet in length:

First 1,000 feet per Point of Service..... No Charge

2. Residential Line Extensions greater than 1,000 feet and less than or equal to 3,000 feet in length:

(a) Estimated annual net revenue is defined as the estimated annual gross revenue calculated in accordance with the Customer's applicable billing rate schedule, less the estimated annual revenue attributable to the ENEC, any revenue based taxes and any associated surcharge.

(b) If nine (9) times the Customer's estimated annual net revenue is greater than the Company's cost of providing 1,000 feet of residential line extension at an average cost per foot of \$5.55\*, the Customer shall receive such excess as a credit toward the cost of an extension greater than 1,000 feet.

(c) Estimated annual net revenue shall be based upon the monthly average kilowatt-hour usage during the calendar year preceding the extension completion for the Customer's applicable billing rate code, unless circumstances of the Customer show this would result in significant error.

(d) The Customer's cost share of a residential line extension greater than 1,000 feet and less than or equal to 3,000 feet is \$5.00 /foot\* times that portion of the extension that exceeds 1,000 feet plus applicable right-of-way clearing costs defined in section C.3. minus the applicant(s) total net revenue credit, if any, as determined by section C.2(a) through C.2(c).

\*The Company will update these charges annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

3. Residential Line Extensions greater than 3000 feet:

Extensions which exceed 3,000 feet per Point of Service shall be calculated from the total estimated cost (excluding right-of-way clearing costs and the cost of facilities specified in Commission's Rule 5.6) of the entire line extension and applied to such portions beyond 3,000 feet. Such extensions shall be subject to the applicable per foot charge and credits set forth in Section C.2 for that portion of such extensions greater than 1,000 feet and less than or equal to 3,000 feet in length.

Effective: January 29, 2009

(N)

LINE EXTENSION PLANS

SCHEDULE "LE"

C. Plan A - Residential Line Extension Plan - Primary or Secondary Line Extensions (continued)

4. Right-of-Way Clearing

The Company, at its expense shall provide right-of-way clearing for the first 1,000 feet of line extension per Point of Service. For extensions in excess of 1,000 feet, the Customer shall have the option of providing the right-of-way clearing for that portion of the extension in excess of 1,000 feet. Customer-provided right-of-way clearing shall be performed to reasonable Company specifications. If the Customer elects to provide the right-of-way clearing in excess of 1,000 feet, the Customer charges indicated below shall not apply. Otherwise, the following charges shall apply based upon the actual footage to be cleared by the Company.

First 1,000 feet per Point of Service..... No Charge

Next 2,000 feet per Point of Service ..... \$ 3.93 /foot\*

Extensions which exceed 3,000 feet per Point of Service shall be calculated from the total estimated right-of-way clearing costs of the entire line extension and applied to such portions beyond 3,000 feet plus the per foot charge above applicable for that portion of such extensions greater than 1,000 feet and less than or equal to 3,000 feet in length.

\*The Company will update these charges annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

5. Applicable charge(s) shall be paid by the Customer in advance of construction or, at the Customer's election, pay a monthly surcharge equal to 2.2% of the total charge. Such monthly surcharge shall be shown on the Customer's monthly bill for electric service and shall remain in effect for a term of five (5) years from the date the Customer first takes service. Customer's electing to pay a monthly surcharge shall agree to take service for not less than five (5) years and pay all related bills.

Applicable charge(s) shall be adjusted and refunds made as new Customers are connected to the extension between its original beginning and the original terminus within a five (5) year period. Each additional Customer whose service is connected to the original extension shall pay the applicable charge as provided herein, based on such Customer's proportionate use of the original extension plus the additional extension length required to serve such additional Customer. The charge then being paid by the Customers served from the original extension shall be reduced in proportion thereto, but in no event shall the aggregate refund made to any Customers exceed the total amount paid to date. New Customer additions which would result in an increase in the extension charges to the original Customer(s) will be treated as a separate extension subject to this schedule.

LINE EXTENSION PLANS

SCHEDULE "LE"

C. Plan A - Residential Line Extension Plan - Primary or Secondary Line Extensions (continued)

6. Overhead Service Drops and Underground Service Laterals:

First 125 feet per Point of Service..... No Charge

In excess of 125 feet per Point of Service ..... \$ 1.51 /foot\*

The above charge shall be paid by the Customer in advance of construction.

\*The Company will update this charge annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

7. Alteration of Facilities

The cost of alterations to line facilities required to serve existing Customers due to relocation of the Company facilities caused by Customer construction or request shall be paid by the Customer. The Customer will not be charged for original facilities retained for such revised service. If an existing Customer's load increases, the Company shall make, if required, appropriate modifications to the individual service line at no cost to the Customer, provided the type of individual service line (overhead or underground) and the Point of Service remains the same. In the case of underground, the Customer shall be responsible for providing all trenching, conduit, backfilling and restoration required to make such alterations.

D. Plan B - Non-Residential Line Extension Plan

The provisions of this Plan shall apply to construction by the Company of single phase and/or three phase extensions to its distribution system to serve permanent non-residential Customers in accordance with the following terms and conditions.

1. The Company will install line extensions at its expense providing the total estimated installed cost of the extension (excluding the cost of facilities specified in Commission's Rule 5.6) to serve Customers does not exceed nine (9) times the Customer's estimated annual net revenue. Estimated annual net revenue is defined as the estimated annual gross revenue calculated in accordance with the Customer's applicable billing rate schedule, less the estimated annual revenue attributable to the ENEC, any revenue based taxes and any associated surcharge. If more than one Customer is to be served from the extension, the cost will be divided among the Customers in proportion to their electrical load and length of extension.
2. The Customer shall pay in advance of construction the amount by which the total estimated installed cost of the extension (excluding the cost of facilities specified in Commission's Rule 5.6) exceeds nine (9) times the estimated annual net revenue.

LINE EXTENSION PLANS

SCHEDULE "LE"

D. Plan B - Non-Residential Line Extension Plan (continued)

3. Limited term financing of construction advances is permitted providing that the financing is offered at reasonable terms and conditions in a non-discriminatory basis.
4. The Company may require a Customer to give evidence of permanence by paying the Company the cost of connection and disconnection as a safeguard for the Company's investment and a protection to its other Customers. The cost of connection and disconnection shall be the total estimated net installed cost of the required facilities, less the salvage value when removed, plus the cost of removal. This payment, less payments calculated in D.2. and/or D.5., will be returned to the Customer at the end of the agreed initial term with interest, provided the Customer has taken continuous service from the Company during those years. The payment covering the cost of connection and disconnection shall be forfeited to the Company and the facilities removed when a Customer does not take continuous service for the initial term. An Electric Service Agreement may be required.
5. Overhead Service Drops and Underground Service Laterals:

Single Phase

First 125 feet per Point of Service ..... No Charge

In excess of 125 feet per Point of Service ..... \$ 1.51 /foot\*

Three Phase

First 125 feet per Point of Service ..... No Charge

In excess of 125 feet per Point of Service ..... \$ 2.50 /foot\*

The above charge shall be paid by the Customer in advance of construction.

\*The Company will update these charges annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

LINE EXTENSION PLANS

SCHEDULE "LE"

D. Plan B - Non-Residential Line Extension Plan (continued)

6. Repair or Replacement of Existing Facilities

(a) Upgrading Company-owned Facilities

When it becomes necessary due to increased load to upgrade Company-owned facilities to provide the Customer with adequate service, the Company shall replace such facilities and charge the Customer the estimated incremental net cost-to-serve which exceeds nine (9) times the Customer's estimated incremental annual net revenue. In the case of underground, the Customer shall be responsible for providing all trench, conduit, backfill and restoration required to make such alterations.

(b) Replacement of Deteriorated or Failed Company-owned Facilities

When it becomes necessary to repair or replace Company-owned facilities due to deterioration or failure, except when such is caused by the negligence of the Customer, their agents or employees, the Company shall repair or replace such facilities at no cost to the Customer. If caused by negligence of the Customer, their agents or employees, the Customer will pay the actual cost to repair or replace.

(c) Replacement or Relocation of Existing Useful Company-owned Facilities at Customer Request

The cost of alterations to Company-owned facilities required to serve an existing Customer caused by Customer construction or request shall be paid by the Customer. A credit for salvageable material will be applied in the cost allocation. The Customer will not be charged for original facilities retained for such revised service.

E. Temporary Service

1. Temporary service is available at the option of the Customer and is defined as service which is not intended to be permanent and is supplied on a month-to-month basis for the duration of the service at one point of delivery and measured through one meter. Service will be furnished only when and where Company has available sufficient capacity in lines, transformers, and generating equipment and at the voltage and phase of Company's distribution system most available.
2. Temporary service Customers will be required to pay all costs of installation and removal of Company facilities, including overheads, with credit being allowed for material salvage value. Payment of such cost and of the estimated bill for service may be required in advance. The Company may make such arrangements for financing its facilities as may be mutually agreed, provided that such arrangement are without preference to or discriminating against such Customer or other Customers of the Company.

Issued by  
D. W. McDonald  
Vice President

Effective: January 29, 2009

**RESIDENTIAL SERVICE RATE  
SCHEDULE "A"**

AVAILABLE for single phase residential use through one meter.

MONTHLY RATE (For a single residence)

Customer Charge - \$ 4.00 per month

Energy Charge

(I) All kilowatt-hours..... \$0.08412 per kilowatt-hour

MINIMUM BILL

The Customer Charge shall be the minimum bill.

LOCAL TAX ADJUSTMENT

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

ENVIRONMENTAL CONTROL CHARGE

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

TERMS OF PAYMENT

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

TERM

A contract may be required for new Customers which require an extension of Company facilities under Company Rule 15, otherwise, no term.

GENERAL

Rates and provisions are subject to "Rules and Regulations for Electric Service."

Where two or more residences located on one premises are supplied through a single meter, each shall be classed as a single residence, and the contracting party will be billed under this schedule, with Customer Charge increased in proportion to the number of residences served. Apartments and trailer courts supplied through one meter shall be billed on an appropriate General Service Rate. (Reference: "Rules and Regulations for the Government of Electric Utilities," issued by the Public Service Commission of West Virginia.)

(I) Denotes Increase

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 09-1485-E-P dated December 29, 2009

Issued: January 8, 2010

Issued by  
R. L. Dickens  
President

Effective: January 1, 2010

**GENERAL SERVICE RATE  
SCHEDULE "B"**

AVAILABLE through a single meter point for service to general service Customers with normal maximum electrical requirements of 10 kW or less per month. When a Customer being served under this Schedule establishes or exceeds a normal maximum electrical requirement of 10 kW per month, the Customer will be placed on the appropriate general service Schedule. Service shall not be available for standby or maintenance service such as that required for Alternative Generation Facilities.

**MONTHLY RATE**

Customer Charge - \$ 4.00 per month

Energy Charge

- (I) First 400 kilowatt-hours..... \$0.09708 per kilowatt-hour
- (I) All additional kilowatt-hours ..... 0.08674 per kilowatt-hour

**MINIMUM BILL**

The minimum bill per month shall not be less than the Customer Charge nor less than \$ 2.41 per kilowatt of capacity necessary to serve the Customer. The Company may install a demand meter for connections which, in any month, are expected to exceed 25 KW demand. Also, the Company may install a demand meter on connections whose usage exceeds 5,000 kWh in any month. If a demand meter has been installed, the maximum reading of the demand meter in the previous 12 months will determine the kilowatt capacity necessary to serve. For connections without a demand meter, a kilowatt of capacity necessary to serve under this schedule shall be defined as the maximum number of kilowatt-hours used in the current month, or in any of the previous 12 months, divided by 120. If a Customer can demonstrate to the Company that his calculated demand is unreasonable, then the Company may change such demand or demands, and may elect to install a demand meter.

**LOCAL TAX ADJUSTMENT**

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

**ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE**

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE**

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

(I) Denotes Increase

of the Public Service Commission of West Virginia  
in Case No. 09-1485-E-P dated December 29, 2009

Issued: January 8, 2010

Issued by  
R. L. Dickens  
President

Effective: January 1, 2010

**GENERAL SERVICE RATE**  
**SCHEDULE "B"** (Continued)

**TERMS OF PAYMENT**

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

**TERM**

A contract may be required for new Customers which require an extension of Company facilities under Company Rule 15, otherwise, no term. If a Customer discontinues service at a location and then requests service again at the same location within one year from date service was discontinued, the Customer will retain the billing history and kilowatt of capacity necessary to serve for minimum bill calculation as if the service had been continuous.

**GENERAL**

Rates and provisions are subject to "Rules and Regulations for Electric Service." Meters installed on or after April 3, 1971 are not combined for billing under this schedule.

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 99-0262-E-GI, dated June 23, 2000

Issued: July 3, 2000

Issued by  
M. P. Morrell  
Vice President

Effective: July 1, 2000

**GENERAL SERVICE RATE  
SCHEDULE "C"**

AVAILABLE at a single place of use for any purpose when all service is combined for billing under this schedule, except that (1) service for heating may be billed separately under a special schedule previously available for such heating service; and (2) service shall not be available for standby or maintenance service such as that required for Alternative Generation Facilities.

**MONTHLY RATE**

Customer Charge - \$ 31.52 per month

	Demand Charge	
(D)	All kilowatts .....	\$10.23 per kilowatt
	Energy Charge	
(I)	All kilowatt-hours .....	\$0.04351 per kilowatt-hour

**MINIMUM BILL**

\$ 3.15 per kilowatt of maximum billing demand established during the initial term or any renewal term while service is supplied under this schedule. Such demand shall not be less than 50% of the kilowatt capacity necessary to serve the Customer, nor less than 10 kilowatts.

**VOLTAGE DISCOUNT**

When service is furnished at a voltage greater than 2,000 volts, a voltage discount of \$0.25 per kilowatt of demand will be applied to all kilowatts of demand, but in no case will the amount of the minimum bill be hereby reduced.

**LOCAL TAX ADJUSTMENT**

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

**ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE**

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE**

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

**TERMS OF PAYMENT**

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

**DETERMINATION OF BILLING DEMAND**

The monthly billing demand will be the maximum number of kilowatts measured over any fifteen-minute interval, except as modified by the provisions for off-peak service.

(D) Denotes Decrease

(I) Denotes Increase

Fourth Revision of  
Original Sheet No. 9A2

**GENERAL SERVICE RATE  
SCHEDULE "C"**

(C) OFF-PEAK SERVICE

Customer may contract for off-peak service, in which case the billing demand will be the higher of: (1) the maximum on-peak demand plus five (5) kilowatts; or (2) the maximum on-peak demand plus 25% of the maximum fifteen-minute off-peak demand over such on-peak demand. On-peak hours are from 7:00 a.m. to 10:00 p.m. Monday through Saturday. All other hours are off-peak.

TERM

For customers with a demand of 100 kW or more, not less than one year. For customers with a demand under 100 kW, a contract may be required for new customers which require an extension of Company facilities under Company Rule 15, otherwise, no term. If a customer discontinues service at a location and then requests service again at the same location within one year from the date service was discontinued, the customer will retain the billing history and maximum billing demand for minimum bill calculations as if the service had been continued.

GENERAL

Rates and provisions are subject to "Rules and Regulations for Electric Service."

Effective: November 16, 1994

**CHURCH AND SCHOOL HEATING RATE  
SCHEDULE "CSH"**

AVAILABLE for electric heating service in a public or parochial school, or in a nonprofit college or university, or in a church, where electricity is used as the sole means of such heating, subject to the definition and conditions stated herein. This schedule is closed except to Customers being served under it and at their current service locations, or having contracted for service under it, on April 25, 1974.

**MONTHLY RATE**

(I) All kilowatt-hours..... \$0.08247 per kilowatt-hour

**DETERMINATION OF KILOWATT-HOURS USED FOR HEATING**

It is preferred that the Customer's wiring be so designed and constructed that the heating service provided under this rate schedule may be metered separately from all other electric service used on the premises. However, at the Customer's option all electric service delivered to the electrically heated church or school facilities may be measured by one meter, in which case 80% of the total quantity of energy so delivered (and 85% of the maximum demand) in any billing period shall be considered to have been used for heating purposes and the balance of the energy use (and demand) registered by the meter shall be considered to have been used for purposes other than heating and shall be billed under an appropriate General Service Rate.

**MINIMUM BILL**

None.

**LOCAL TAX ADJUSTMENT**

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

**ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE**

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE**

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

**TERMS OF PAYMENT**

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

**GENERAL**

Rates and provisions are subject to "Rules and Regulations for Electric Service."

The word "school" is used in this rate schedule in its customary sense to refer to a grade school, high school (through the twelfth grade), college, or college-related technical schools, consisting of but not limited to classrooms, laboratories, manual arts shops, domestic science kitchens, dormitories, and other facilities customarily associated with such schools. However, service for athletic field flood lighting, heavy duty shop motors, welding equipment, and for other special purposes will be excluded from the total service in the determination of quantities used for heating by the optional percentage method.

The word "church" is used in this rate schedule in its customary sense to refer to a building used principally for weekly services of religious worship and only incidentally at other times for activities related to religious objectives.

(I) Denotes Increase

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 09-1485-E-P dated December 29, 2009

Issued: January 8, 2010

Issued by  
R. L. Dickens  
President

Effective: January 1, 2010

**GENERAL SERVICE RATE  
SCHEDULE "D"**

AVAILABLE at a single place of use for any purpose when all deliveries are at the standard distribution voltage of the immediate area as designated by Company but not less than 1,000 volts, and through one metering point, except that service shall not be available for standby or maintenance service such as that required for Alternative Generation Facilities. An Electric Service Agreement shall be executed.

**MONTHLY RATE**

**Demand Charge**

(D)	First 500 kilowatts .....	\$13.92 per kilowatt
(D)	All additional kilowatts.....	12.71 per kilowatt
	All kilovars in excess of 35% of the current kilowatt billing demand .....	0.40 per kilovar

**Energy Charge**

(I)	All kilowatt-hours.....	\$0.03618 per kilowatt-hour
-----	-------------------------	-----------------------------

**MINIMUM BILL**

The minimum monthly bill shall not be less than the highest of the following:

1. The demand charge, or
2. \$ 2.70 per KW of the highest billing demand established during the preceding 12 months, or
3. \$ 2.70 times 50% of the kilowatt capacity set forth in the Agreement.

**VOLTAGE DISCOUNT**

When service is furnished at a voltage greater than 15,000 volts, a voltage discount of \$0.25 per kilowatt of demand will be applied to all kilowatts of demand, but in no case will the amount of the minimum bill be hereby reduced.

**LOCAL TAX ADJUSTMENT**

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

**ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE**

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE**

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

**TERMS OF PAYMENT**

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

**DETERMINATION OF BILLING DEMAND**

The monthly billing demand will be the maximum kilowatts and kilovars each integrated over any fifteen-minute interval, except as modified under the provisions for off-peak service, but in no case shall the monthly billing demand be less than 200 kilowatts.

**SCHEDULE "D"** (Continued)

(C) OFF-PEAK SERVICE

Customer may contract for off-peak service for a demand in excess of the on-peak demand by not less than fifty (50) kilowatts. The billing demand will be the higher of: (1) the maximum on-peak demand plus twenty-five (25) kilowatts; or (2) the maximum on-peak demand plus 25% of the maximum fifteen-minute off-peak demand over such on-peak demand. On-peak hours shall be 7:00 A.M. to 10:00 P.M. Monday through Saturday. All other hours are off-peak.

TERM

Initial term as specified in Electric Service Agreement, but not less than one year.

GENERAL

Rates and provisions are subject to "Rules and Regulations for Electric Service."

(C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

Issued: November 27, 1996  
Name change made September 1, 1996.

Issued by  
J. S. Pifer  
President

Effective: November 16, 1994

**GENERAL POWER SERVICE RATE  
SCHEDULE "K"**

AVAILABLE to single point of delivery for balanced three-phase power loads of not less than 3,000 kilovolt-amperes (1,000 kilovolt-amperes for customers served hereunder prior to July 22, 1980) at prevailing voltages as designated by Company but not less than 15,000 volts. Also available at Company standard voltages between 10,000 and 15,000 volts where Company elects to supply service by one transformation from an adjacent transmission line operated at a voltage in excess of 100,000 volts. An Electric Service Agreement shall be executed.

MONTHLY RATE

Demand Charge	
(D)	First 1,000 kilovolt-amperes..... \$8.875 per kilovolt-ampere
(D)	All additional kilovolt-amperes ..... 7.855 per kilovolt-ampere
Energy Charge	
(I)	All kilowatt-hours..... \$0.03820 per kilowatt-hour

LINE VOLTAGE CHARGE

When customer desires to take service under this schedule at a voltage between 10,000 and 15,000 volts at a service point located more than 700 feet from Company's substation serving customer, an additional line voltage charge shall apply. Such charge shall be \$ 0.40 per kilovolt-ampere of billing demand. This additional line voltage charge shall not apply to customers served on this schedule prior to June 12, 1991.

DETERMINATION OF BILLING DEMAND

Demand

The maximum kilovolt-amperes integrated over any 15-minute interval plus 25% of any excess of maximum instantaneous single operating peak over 150% of the maximum 15-minute value shall constitute the demand.

Billing Demand

The billing demand for any month shall be the maximum demand measured during on-peak hours as hereinafter defined plus 25% of the excess of the maximum off-peak demand over such on-peak demand but in no case shall be less than the highest of the following:

- (a) 1,000 kilovolt-amperes for customers served hereunder before July 22, 1980.
- (b) 3,000 kilovolt-amperes for customers served hereunder on or after July 22, 1980.
- (c) 50% of the kilovolt-ampere capacity specified in the Electric Service Agreement.
- (d) 70% of the maximum billing demand for the 12 months prior to the billing month.

On-peak hours shall be from 7:00 A.M. to 10:00 P.M. Monday through Saturday. All other hours are off-peak.

MINIMUM BILL

The demand charge shall constitute the monthly minimum bill.

(D) Denotes Decrease

(I) Denotes Increase

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 09-1485-E-P dated December 29, 2009

Issued: January 8, 2010

Issued by  
R. L. Dickens  
President

Effective: January 1, 2010

**GENERAL SERVICE RATE**  
**SCHEDULE "K"** (Continued)

LOCAL TAX ADJUSTMENT

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

(C) WEST VIRGINIA ECONOMIC INCENTIVE CREDIT

A West Virginia Economic Incentive Credit shall apply, as outlined on Sheet No. 5E1 of this tariff.

ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

ENVIRONMENTAL CONTROL CHARGE

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

TERMS OF PAYMENT

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

TERM

The initial term of Electric Service Agreement for service under this schedule shall be 5 years. Agreement shall remain in force thereafter until twelve months after written notice of cancellation has been given by either party to the other. After the initial term, customer can change the Agreement capacity amount, but can do so no more often than every 12 months.

GENERAL

Rates and provisions are subject to "Rules and Regulations for Electric Service."

This schedule is intended primarily for service to customer's operations where the entire electrical requirements are purchased from the Company. Where a part of such requirement is supplied from a source other than the Company's facilities, special contract provisions will be required setting forth the special operating and billing conditions.

Customer shall provide protective equipment, satisfactory to Company, at point of delivery.

(C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 07-0508-E-CN

Issued: December 31, 2009

Issued by

President

Effective: January 1, 2010

**LARGE POWER SERVICE RATE  
SCHEDULE "P"**

AVAILABLE at a single point of delivery for balanced three-phase power of not less than 10,000 kilovolt-amperes at prevailing line voltages above 100,000 volts, except that loads lower than 10,000 kilovolt-amperes being served under this schedule on April 3, 1971 will continue to be eligible for service under this schedule. An Electric Service Agreement shall be executed.

**MONTHLY RATE**

	Demand Charge	
(l)	First 3,000 kilovolt-amperes .....	\$10.037 per kilovolt-ampere
(l)	Next 14,000 kilovolt-amperes .....	9.623 per kilovolt-ampere
(l)	Additional kilovolt-amperes.....	9.310 per kilovolt-ampere
	Energy Charge	
(l)	All kilowatt-hours.....	\$0.03977 per kilowatt-hour

**DETERMINATION OF DEMAND**

**Demand**

The maximum kilovolt-amperes integrated over any 30-minute interval plus 15% of any excess of maximum instantaneous single operating peak over 150% of the maximum 30-minute value shall constitute the demand.

**Billing Demand**

The billing demand for any month shall be the maximum demand measured during on-peak hours as hereinafter defined plus 15% of the excess of the maximum off-peak demand over such on-peak demand but in no case shall be less than the highest of the following:

- (a) 3,000 kilovolt-amperes for service points existing at April 3, 1971, or
- (b) 10,000 kilovolt-amperes for service points established after April 3, 1971.
- (c) 60% of the kilovolt-ampere capacity specified in the Electric Service Agreement.
- (d) 70% of the highest billing demand for the 12 months prior to the billing month.

On-peak hours shall be from 7:00 A.M. to 10:00 P.M. Monday through Saturday. All other hours are off-peak.

**MINIMUM BILL**

The demand charge shall constitute the monthly minimum bill.

**LOCAL TAX ADJUSTMENT**

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

**WEST VIRGINIA ECONOMIC INCENTIVE CREDIT**

A West Virginia Economic Incentive Credit shall apply, as outlined on Sheet No. 5E1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE**

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE**

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

**PRIVATE OUTDOOR LIGHTING SERVICE RATE**  
**SCHEDULE "SL-P" (Continued)**

ADDITIONAL CHARGES FOR OPTIONAL INSTALLATION (Restricted-See\*\*\*):

	<u>Additional Monthly Charge</u>
8,150 Lumen Mercury Vapor Unit	
with 8' Arm .....	\$0.23 per lamp
8,150, 11,500, 21,500 or 60,000 Lumen Mercury Vapor Unit	
with 10' Arm .....	0.57 per lamp
with 12' Arm .....	0.75 per lamp
with 15' Arm .....	0.90 per lamp

\*\*\* Restricted to equipment in service on September 1, 1985. They are not available for new or additional installations.

TERM

Not less than one year. When underground circuits are furnished, the term shall be five years.

LOCAL TAX ADJUSTMENT

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

(N) ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

ENVIRONMENTAL CONTROL CHARGE

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

TERMS OF PAYMENT

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

GENERAL

Rates and Provisions are Subject to "Rules and Regulations for Electric Service."

Where customer desires an installation different from the standard type described above, such as an underground or ornamental system, customer will pay in advance the cost of installing such additional facilities. Customer will also be required to pay Company for any additional costs required for the operation and maintenance related to these additional facilities.

(N) Denotes New

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 07-0930-E-T, dated January 14, 2008

Issued by  
D. E. Flitman  
President

Effective: January 15, 2008

**PRIVATE OUTDOOR LIGHTING SERVICE RATE**  
**SCHEDULE "SL-P" (Continued)**

GENERAL (Continued)

All facilities necessary for supplying service including fixture, controls, poles, transformers, secondary circuits, lamps, and other appurtenances shall be owned and maintained by the Company. Units must be mounted on existing Company poles or new poles installed by the Company.

When service requested after March 1, 1975, under this schedule cannot be supplied from an existing pole, the Company will at the customer's request, install poles and spans of wire, which can be connected to an existing secondary circuit. The customer will pay in advance the cost of installing such additional facilities.

(D) Lights being served by additional facilities on March 1, 1975, under this schedule for which there is an additional charge will pay a monthly rental of \$0.60 for each span of overhead secondary circuit not over 150 feet in length, and \$1.29 for each standard distribution wood pole required. This provision is not available for new or additional installations.

Customer shall select the location of poles installed on customer's property, but such locations shall conform to all safety standards as well as to any municipal and state regulations. Poles will be moved after installation at the customer's request only upon payment by the customer of the actual cost of such moving.

Customer shall be responsible for all damages to, or loss of Company property located on customer's premises unless caused by elements beyond the customer's control.

Customer shall obtain written approval from public authorities for lights to be located on public thoroughfares.

All servicing and maintenance will be performed only during the regular scheduled working hours of the Company, and Company shall be allowed two working days after notification by the customer to replace burned-out lamps.

(D) Denotes Decrease

**STREET AND HIGHWAY LIGHTING SERVICE RATE  
 SCHEDULE "MV"**

AVAILABLE for outdoor Mercury Vapor Lighting service for streets, highways, and other public places of incorporated communities or other governmental units contracted for prior to November 26, 1997. Standard service (Items 1, 2, and 3 below) under this schedule shall be supplied from overhead lines and from Company's standard type lamps, fixtures, supporting arms, ballasts, conductors, and other appurtenances, using wood distribution poles unrestricted as to their use by Company for purposes other than street lighting. The rating of lamps in lumens is for identification and shall approximate the manufacturer's standard rating.

MONTHLY RATE

- (l) 1. Standard Semi-Enclosed Type Luminaire on 6-Foot Bracket or Less:  
 8,150 Lumen (175 Watt) Lamp (74 kWh) .....\$ 9.54 per lamp
  - 2. Standard Enclosed Type Luminaire on 8-Foot Bracket or Less:

**STREET AND HIGHWAY LIGHTING SERVICE RATE**  
**SCHEDULE "MV" (Continued)**

**TERMS OF PAYMENT**

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

**AGREEMENT AND TERM**

Service under this schedule will be supplied only under Company's standard form of agreement for a term of not less than 10 years.

**GENERAL**

Rates and provisions are subject to "Rules and Regulations for Electric Service," and the provisions of the standard agreement for municipal street lighting.

Where customer desires an installation different from the standard type described above, such as an underground or ornamental system, customer will be required to pay to Company before work is started that part of the estimated construction cost of such system which is in excess of the estimated construction cost of a standard type installation. Customer will also be required to pay Company for any additional costs required for the operation and maintenance related to this nonstandard installation. For those nonstandard systems installed prior to June 12, 1991, where an additional monthly charge was determined to pay for the nonstandard system, such additional monthly charge will continue.

of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

Issued: November 27, 1996  
Name change made September 1, 1996.

Issued by  
J. S. Pifer  
President

Effective: November 16, 1994

**STREET AND HIGHWAY LIGHTING SERVICE RATE  
SCHEDULE "SV"**

AVAILABLE for outdoor high pressure sodium vapor (HPS) lighting service contracted for prior to November 26, 1997 for streets, highways, and other public places of incorporated communities or other governmental units. Standard service shall be supplied from overhead lines and from Company's standard type lamps, fixtures, supporting arms, ballasts, conductors, and other appurtenances, using wood distribution poles unrestricted as to their use by Company for purposes other than street lighting. The rating of lamps in lumens is for identification and shall approximate the manufacturer's standard rating.

**MONTHLY RATE**

	1. Standard Semi-Enclosed Type HPS Unit on 6-Foot Bracket or less:	
(l)	9,500 Lumen (100 watt) Lamp (51 KWH) .....	\$ 7.50 per lamp
	2. Standard Enclosed Type HPS Cobra Luminaire on 8-Foot Bracket or less:	
(l)	9,500 Lumen (100 watt) Lamp (51 KWH) .....	\$ 8.09 per lamp
(l)	22,000 Lumen (200 watt) Lamp (86 KWH) .....	11.65 per lamp
(l)	50,000 Lumen (400 watt) Lamp (167 KWH) .....	18.16 per lamp
	3. Standard HPS Floodlight on Bracket:	
(l)	22,000 Lumen (200 watt) Lamp (86 KWH) .....	\$11.65 per lamp
(l)	50,000 Lumen (400 watt) Lamp (167 KWH) .....	18.16 per lamp
	4. Pole Top Mounted 9,500 Lumen HPS Unit:	
(l)	On Standard Pole (51 KWH) .....	\$13.95 per lamp

Installations under Item 4. include Company standard pole with mounting height approximately 14 feet, a concrete base if required, installed where service is supplied from an existing underground distribution system and the point of connection for secondary service is located within three feet of the base of the light pole. For installations requiring additional facilities, customer shall pay installed costs of the additional facilities and actual costs for any maintenance performed on the additional facilities.

**LOCAL TAX ADJUSTMENT**

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

**ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE**

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

**ENVIRONMENTAL CONTROL CHARGE**

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

**TERMS OF PAYMENT**

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

**AGREEMENT AND TERM**

Service under this schedule will be supplied only under Company's standard form of agreement for a term of not less than 10 years.

**STREET AND HIGHWAY LIGHTING SERVICE RATE  
SCHEDULE "SV"**

GENERAL

Rates and provisions are subject to "Rules and Regulations for Electric Service," and the provisions of the standard agreement for municipal street lighting.

Where customer desires an installation different from the standard type described above, such as an underground or ornamental system, customer will be required to pay to Company before work is started that part of the estimated construction cost of such system which is in excess of the estimated construction cost of a standard type installation. Customer will also be required to pay Company for any additional costs required for the operation and maintenance related to this nonstandard installation.

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

President

Effective: November 16, 1994

**COGENERATION  
SCHEDULE "CO-G"**

AVAILABILITY

This schedule is applicable for purchases of electricity by the Company from such qualifying facilities (QF) as cogenerators or small power producers as defined in Part 292, Subpart B of the Public Utility Regulatory Policies Act of 1978 regulations. The Company may require proof that the QF meets the requirements for a qualifying facility under those regulations.

This schedule is available for power to be supplied by the QF to the Company at a single point of delivery in amounts of 100 Kw or less.

This schedule may be used in conjunction with any of the Company's filed rate schedules presently in effect and applicable to the supply of electric service to a customer.

MONTHLY RATE

Energy

(a) If time-of-day metering has been installed, the following energy rates apply:

On-Peak - .....1.570 cents per kilowatt-hour  
Off-Peak - .....1.502 cents per kilowatt-hour

(b) If time-of-day metering has not been installed, the following energy rate applies:

.....1.502 cents per kilowatt-hour

Capacity

If a QF enters into a contract with the Company of at least two years duration to provide dependable capacity to the Company for a specified number of years, the Company will purchase capacity from the QF (at a capacity rate per on-peak Kwh) in accordance with the following schedule. The date when energy and capacity are first provided to the Company by the QF on a regular basis is defined as the contract service date. In order to receive capacity payments, the QF must provide energy and capacity on a time-of-day basis. The capacity rate will be paid per Kwh delivered during the on-peak period and is in addition to the energy rate paid to the QF.

From the contract service date through the eighth year of the contract: 0.50 cents per kilowatt-hour.

For the ninth through the final year of the contract: the greater of 0.50 per kilowatt-hour, or the monthly fixed charge per Kw of the last fossil-fueled steam generating unit to be declared in commercial operation on the Allegheny Power System during or prior to the eighth year of the contract, based on its installed cost as of the commercial operation date, times a ratio of the contract term in years divided by thirty-three - said ratio not to exceed one, divided by 456 (the average number of on-peak hours in a month).

**COGENERATION  
SCHEDULE "CO-G"**

**ON-PEAK AND OFF-PEAK PERIODS**

The on-peak period shall be defined as the hours between 7:00 a.m. and 10:00 p.m. daily.

The off-peak period shall be defined as the hours between 10:00 p.m. and 7:00 a.m. daily.

**CONNECTION CHARGE**

For each connection under this schedule, the QF will pay to the Company a monthly charge based on the type of meter installed. The monthly charge is as follows:

Basic watt-hour meter.....	\$ 5.08
Time-of-use watt-hour meter.....	5.83
Recording time-of-use meter.....	19.62

**TERM**

One year or longer.

**SALES TO QUALIFYING FACILITIES**

Supplementary, backup, interruptible, and maintenance power will be supplied by the Company to the QF under applicable standard rate schedules.

**INTERCONNECTION COSTS**

All interconnection costs including interconnection costs incurred by the Company which are necessary to purchase energy or energy and capacity from the QF or to supply backup power are the responsibility of the QF. The Company will provide a nonbinding estimate of all interconnection costs to be incurred by the Company.

The QF is responsible for providing, installing, owning, and maintaining at its expense all equipment on the QF's side of the interconnection point. The QF must submit its interconnection plans and specifications to the Company, and the Company shall accept or reject those plans. The Company will inspect and approve the installation prior to making the interconnection. The inspection will be conducted by the Company, and the results of the inspection will be provided to the QF. The costs of any additional Company inspection required shall be borne by the QF. The QF is also responsible for obtaining Company approval for equipment and material specifications prior to making any modifications.

- a. The review and/or acceptance by the Company of the application for interconnection or plans and specifications for such interconnection submitted by a small power producer or cogenerator does not and shall not be construed (a) as confirming or endorsing the design of the customer's facilities or (b) as any warranty of safety, durability or reliability of the facilities.
- b. The Company shall not, by reason of any review or acceptance of the plans and specifications or application for interconnection submitted by a small power producer or cogenerator, be

**COGENERATION  
SCHEDULE "CO-G"**

INTERCONNECTION COSTS (Continued)

responsible for strength, details of design, adequacy, or capability of the customer's facilities; nor shall the Company's acceptance and/or review of said plans and specifications or application for interconnection be deemed an endorsement or warranty of those facilities.

The Company installs, owns, and maintains at the QF's expense all metering equipment needed to measure separately the electricity delivered to the Company. Access shall be granted by the QF to the Company's authorized representative during any reasonable hours to install, inspect, and maintain the Company's metering equipment.

The QF may elect to repay Company expended interconnection and meter costs as well as any administrative and related costs, including interest on the unpaid amounts at the rate of the Company's most recent issue of long-term debt, over a period of not greater than 36 equal monthly payments, in which case the QF is required to provide a Surety Bond or equivalent security acceptable to the Company to ensure the payment schedule.

SAFETY AND RELIABILITY

The Company has established standards to insure safety and reliability of interconnected operations. These standards are set forth in APS Engineering Manual Section 35, Subject Index 1.0, and are titled Customer-Owned Generators, Interconnection Policy and Guidelines ("Standards"). These Standards have been filed with the Commission. They are incorporated herein by reference, will be enforced, and must be satisfied before the Company will interconnect with the QF. A copy of these Standards will be provided to a prospective QF upon request. The following is a brief outline of the Standards.

The QF assumes sole responsibility to design and install its system for protection against faults or disturbances on the Company system.

Interconnection with the Company's system requires the installation of protective equipment by the QF which, in the Company's judgment, provides safety for persons, property and equipment affected, and prevents interference with the Company's supply of service to others, including voltage, frequency, or waveshape of power. After installation and at any time this rate is in effect, the Company shall have the right to inspect all the facilities and their operation, and to test all protective equipment.

QF generation must operate in parallel with Company generation. QF must provide synchronizing equipment which will automatically isolate the QF generation from the Company system if the Company's circuit becomes de-energized or if the QF should lose synchronization.

Parallel operation must cease immediately and automatically during system outages and other emergency or abnormal conditions as specified by the Company, or when maintenance on Company facilities is being performed and safety considerations require the de-energizing of the QF. The Company is not liable for and accepts no responsibility whatsoever for any loss, cost, expense, damage or injury to any person or property resulting from the use or presence of electric current or voltage which originates from a QF's generation facilities, or is caused by failure of the QF to operate in compliance with Company requirements.

**COGENERATION  
SCHEDULE "CO-G"**

SAFETY AND RELIABILITY (Continued)

The Company may disconnect from the QF's facilities from time to time in order that the Company can (1) construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or any part of its system; or (2) if the Company determines that curtailment, interruption, or reduction of deliveries of energy or energy and capacity is necessary because of technical system emergencies including forced outages and operating conditions on its system, or as otherwise required by prudent electrical practices.

The QF generation equipment must be equipped with a Company-controlled, and easily accessible, manually operable disconnecting device capable of being locked in the open position to isolate the QF's generator from the Company system. Interlocks must be provided to preclude paralleling the generator through any point other than the designated interconnection point.

Automatic reclosing shall not be installed on the interconnection disconnecting device.

QF equipment must be equipped with a Company-approved overcurrent protective device and necessary relaying to interrupt generator fault current due to faults on the Company system.

The QF may be required to install current limiting reactors to limit the magnitude of QF-owned generator fault current.

PERIODS DURING WHICH PURCHASES ARE NOT REQUIRED

The Company will not be required to purchase energy or capacity during a system emergency or during periods of maintenance when safety considerations would require the de-energizing of facilities. Whenever possible, the Company will notify the QF by telephone, followed by written confirmation, of such circumstances.

FAILURE TO OPERATE

If capacity payments are based on long-term dependable capacity, QF agrees that if the facility ceases operation prior to the end of the term of the contract, then the QF shall be liable to the Company for the total difference between the actual payments for capacity paid to the QF and the payments for capacity that would have been paid to the QF if calculations were based on the actual term of the operation. The Company will be entitled to interest on the overpayments at the rate of the Company's most recent issue of long-term debt at the time of the Company's initial monthly over payment for capacity to the QF.

GENERAL

The QF is solely responsible for the proper installation, operation, and maintenance of any equipment used to interconnect with the Company system, and is liable for any claim, demands, suits, actions, any judgments and all costs, expenses, pecuniary or other loss which may arise directly or indirectly from any act or omission of the QF, its agents, servants, or employees.

Maintenance and operation of the generator and associated equipment will be the responsibility of the QF.

Failure of the QF to comply with any of the Company's provisions or requirements shall result in disconnection from the Company's system and the Company will be under no obligation to make subsequent purchases of electricity until the QF complies with all the Company's requirements.

**INTERRUPTIBLE POWER SERVICE  
SCHEDULE "IP"**

AVAILABLE for interruptible power service at not less than 100,000 volt balanced three phase for loads of 5,000 kilovolt-amperes or greater to the extent that Company has capacity for such service at the point of supply. An Electric Service Agreement shall be executed.

**MONTHLY RATE**

Subject to negotiation and final approval of the Public Service Commission of West Virginia.

**CONDITIONS**

Subject to negotiation and final approval of the Public Service Commission of West Virginia.

**TERM OF AGREEMENT**

Subject to negotiation and final approval of the Public Service Commission of West Virginia.

**GENERAL**

Rates and provisions are subject to "Rules and Regulations for Electric Service."

The facilities to be provided by Company for service supplied under this rate schedule are limited to (1) a single tap line of Company's standard wood pole construction, not more than three miles in length over rights-of-way procured at normal cost, to connect customer's facilities with Company's facilities operated at a voltage above 100,000 volts, (2) such protective and control equipment as Company considers necessary at the point of connection of the tap line with Company's main line, and (3) the metering transformers and instruments necessary to measure the quantities delivered to customer through a single point of delivery.

Customer shall provide protective equipment, satisfactory to Company, at service delivery point.

The schedule is intended primarily for service to customer's operations where the entire electrical requirements are purchased from the Company. Where a part of such requirements is supplied from a source other than the Company's facilities, special contract provisions may be required setting forth the special operating and billing conditions.

Items of dispute that cannot be negotiated by the Company and potential customers will be resolved by the Public Service Commission of West Virginia.

**ALTERNATIVE GENERATION SCHEDULE  
SCHEDULE "AGS"**

(C) AVAILABLE for the sale of electricity to customers, including small power producers and cogenerators which are qualifying facilities as defined in the Public Utility Regulatory Policies Act of 1978. To qualify for this schedule, customer, at the site of customer's service under this schedule (such site located in the Company's West Virginia service territory), must operate or utilize electric service from active on-site electrical generation facilities not owned by the Company ("Alternative Generation Facilities"). Electricity sold under this schedule may not be resold; nor may it be used to operate the auxiliary loads of the alternative generation facilities while those facilities are generating electricity for sale to a subsidiary of the Allegheny Power System, Inc., except during periods of emergency on the alternative generation station service facilities and with the approval of the Company. A recording demand meter must be installed on all connections receiving service under this schedule. An Electric Service Agreement shall be executed.

**DETERMINATION OF DEMAND**

Demand or kW demand noted in this schedule shall be the kW demand integrated over the demand interval. Demand interval shall be of the same duration specified in the rate schedule under which standard service is provided the customer. If standard service is not provided by the Company, the demand interval shall be 15 minutes.

**TYPES OF SUPPLY**

Types of power supply available are Supplementary, Maintenance (Firm or Interruptible), and Standby (Firm or Interruptible). For the purposes of this schedule, "normal alternative generation" for the current billing period shall be determined as follows:

- (1) The most recent three billing periods each of which contains at least one demand interval period during which alternative generation occurred and no Standby or Maintenance Power was used will be selected and the total number of such demand intervals which occur in those periods shall be identified;
- (2) The net kWh of alternative generation for all the intervals identified in (1) shall be totaled;
- (3) The net kWh totaled in (2) shall be divided by the quantity (total number of intervals ÷ intervals per hour) to obtain the average kW of normal alternative generation.

SUPPLEMENTARY POWER is power that is used by the customer in addition to that normally produced by the alternative generation facilities. Supplementary Power is available to the customer under applicable existing standard rate schedules with the billing units determined as described herein. All power provided to the customer by the Company shall be deemed to be Supplementary Power unless the Company determines that it is Maintenance Power or Standby Power as described below.

FIRM OR INTERRUPTIBLE MAINTENANCE POWER is power which is used by the customer and replaces the alternative generation during periods of scheduled maintenance of the alternative generation facilities. Maintenance Power is subject to the following constraints:

(C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

Issued: November 27, 1996  
Name change made September 1, 1996.

Issued by  
J. S. Pifer  
President

Effective: November 16, 1994

**ALTERNATIVE GENERATION SCHEDULE  
SCHEDULE "AGS"**

- (1) In each calendar year, Firm Maintenance Power may be made available not more than 70 days during the periods from March 15 to May 31, inclusive, or from September 15 to November 30, inclusive.
- (2) Availability of Firm Maintenance Power shall be determined by the Company upon the customer's written request at least 30 days but not more than 120 days in advance of the date the customer wishes to begin receiving such power. The Company shall notify the customer whether Firm Maintenance Power will be available during the period requested, and if not, when Firm Maintenance Power will be available.
- (3) If the customer is informed by the Company that Firm Maintenance Power will not be available as requested, the customer may elect to take Interruptible Maintenance Power for the period for which Firm Maintenance Power will not be available, provided that the customer gives the Company seven days advance written notice thereof. In no event, however, may the number of days upon which Firm or Interruptible Maintenance Power is taken exceed a total of 70 in a calendar year.
- (4) If the customer ceases use of Maintenance Power before the end of the scheduled period, the customer must notify the Company by telephone and send or deliver a notice in writing to the Company no later than one business day after the customer ceases such use.
- (5) All requests for Firm Maintenance Power and notices of Interruptible Maintenance Power must specify the kilowatt capacity required, as well as the beginning and the end of the Maintenance Power period.
- (6) The Company shall not supply Maintenance Power in excess of the normal alternative generation for the billing period.
- (7) During any period that Firm Maintenance Power is made available, the Maintenance Power Agreement Capacity shall be the capacity of Firm Maintenance Power expressed in kilowatts that the Company agreed to deliver to the customer during that period.
- (8) During any period that Interruptible Maintenance Power is used by the customer, the Maintenance Power Agreement Capacity shall be the capacity expressed in kilowatts of Interruptible Maintenance Power specified in the customer's written notice of Interruptible Maintenance Power use.

FIRM OR INTERRUPTIBLE STANDBY POWER is power made available by the Company for the customer's use and which replaces the alternative generation capacity utilized by the customer during an unscheduled outage of the alternative generation facilities. It will be available under the following conditions:

- (1) The customer must contract in advance for either Firm or Interruptible Standby Power, but not both, and an initial Standby Power Agreement Capacity must be specified by the customer and approved by the Company before delivery of Standby Power.
- (2) Interruptible Standby Power will be available only to customers who contract for at least 5,000 kW thereof.

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

**ALTERNATIVE GENERATION SCHEDULE  
SCHEDULE "AGS"**

- (3) Standby Power will not be provided for more than 20% of the hours in any twelve-month period. After those hours of Standby Power have been exhausted, any power supplied, unless determined by the Company to be Maintenance Power, will be billed to the customer as Supplementary Power. If the customer has not previously contracted for Supplementary Power, such Supplementary Power shall be billed as a temporary service under General Service Rate Schedule "C."
- (4) The customer shall be deemed to have used Standby Power for any demand interval during which: a) Maintenance Power was scheduled; and b) the demand created exceeds the sum of the then effective Maintenance Power Agreement Capacity and kilowatt portion of the customer's Supplementary Power Demand.
- (5) The three-month period beginning on the date the alternative generation facilities first operate in parallel with the Company's facilities shall not be used in the determination of the number of Standby Power hours used by the customer.
- (6) The customer must notify the Company by telephone and send or deliver a follow-up notice in writing within one business day of the beginning of an unscheduled outage of the customer's facilities requiring the use of Standby Power. Such notice shall specify the time the outage began, the cause of the outage, and its estimated duration. At the end of such an unscheduled outage, the customer must notify the Company by telephone and send or deliver a notice in writing to the Company within one business day of the end of the outage. Such notice shall include the final determination of the outage cause and duration. The Company may require verification of the cause of the unscheduled outage.
- (7) If a Standby Power Billing Demand is established which is greater than the Standby Power Agreement Capacity, the Standby Power Agreement Capacity shall automatically be increased to that greater value.
- (8) The Company shall not provide Standby Power in excess of the normal alternative generation for the billing period.

**INTERRUPTIBLE POWER PROVISIONS**

**Obligations**

Interruptible Maintenance or Interruptible Standby Power shall be interrupted when, in the sole judgment of the Company, any production, transmission, or distribution limitations exist. During an interruption period, the customer's total load must be reduced to no more than the sum of the firm capacity, if any, specified in the Electric Service Agreement under which Supplementary Power is provided plus the Firm Standby Power Agreement Capacity, if the customer is using Firm Standby Power at the time, plus the Firm Maintenance Power Agreement Capacity, if any, which may be in effect at the time. The interruption period shall begin with the second full demand interval after commencement of an interruption by the Company and continuing through the demand interval immediately preceding termination of that interruption.

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

**ALTERNATIVE GENERATION SCHEDULE  
 SCHEDULE "AGS"**

Penalty

The maximum by which the customer's kilowatt demands exceed the sum of the customer's firm capacities (i.e., the sum of the customer's Supplementary, Maintenance, and Standby Firm capacities as applicable) during each interruption period shall be subject to a penalty charge. Only one such penalty shall be assessed per interruption period. The first time that the customer is notified by the Company to interrupt service and the customer fails to reduce load to not more than the sum of its firm capacities, a penalty of \$10 per kilowatt shall be applied to those kilowatts in excess of firm capacities. Upon the second occurrence of such a failure to interrupt, a penalty of \$10 per kilowatt calculated as set forth above shall be applied and interruptible service shall not be available to the customer for the next two years. Upon the third occurrence of such a failure to interrupt, a \$10 per kilowatt penalty shall be applied and interruptible service shall no longer be available to the customer.

MONTHLY RATE

Demand Charge

		<u>Service Voltage</u>		
		<u>0-15,000</u>	<u>15,000-100,000</u>	<u>Over 100,000</u>

Issued by  
 R. L. Dickens  
 President

Effective: January 1, 2010

**ALTERNATIVE GENERATION SCHEDULE  
SCHEDULE "AGS"**

Energy Charge

- (I) All Standby and Maintenance Kilowatt-hours ..... \$0.08965 net per kilowatt-hour

TERMS OF PAYMENT

Bills are due and payable upon presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within 20 days from the date mailed.

DETERMINATION OF DEMANDS

("Normal alternative generation" as used below is defined above in Types of Supply.)

Power Demands

As a preliminary step to the determination of Billing Demands, the customer's Power Demands shall be determined as specified below:

- (1) Supplementary Power Demand shall be determined as specified below for the billing period unless the applicable standard rate schedule requires that the determinations specified below be made using other periods. Any instantaneous operating peak provision of the applicable standard rate schedule shall be included. If the applicable standard rate schedule has a demand charge based on kilovolt-amperes, the determinations specified below shall be performed based on kilovolt-ampere demands instead of kilowatt demands.

The demand for each period shall be the highest of:

- (a) The maximum kilowatt demand created during the intervals in the period when no Maintenance Power or Standby Power is used, or if no such intervals exist in the period, the lesser of:
- (i) the Supplementary Power Demand of the previous period; or
  - (ii) the maximum kilowatt demand created during the period; or
- (b) The maximum kilowatt demand created during the period less the normal alternative generation for the billing period; or
- (c) The maximum by which a kilowatt demand created during the period exceeds the sum of the then effective Maintenance Power Agreement Capacity and the Standby Power Agreement Capacity being utilized.
- (2) Maintenance Power Demand shall be the maximum Maintenance Power Agreement Capacity for the billing period, regardless of whether it is for Firm or Interruptible Maintenance Power.

(I) Denotes Increase

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 09-1485-E-P dated December 29, 2009

Issued: January 8, 2010

Issued by  
R. L. Dickens  
President

Effective: January 1, 2010

**ALTERNATIVE GENERATION SCHEDULE  
SCHEDULE "AGS"**

- (C) (3) Standby Power Demand shall be either:
- (a) The lesser of:
    - (i) The Standby Power Agreement Capacity, or
    - (ii) The maximum by which a kilowatt demand created during such intervals of the billing period when Standby Power is used exceeds the sum of the then effective kilowatt portion of the Supplementary Power Demand and Maintenance Power Agreement Capacity.
- or
- (b) For customers who normally have no supplementary power requirements, the maximum kilowatt demand created during such intervals of the billing period when Standby Power is used.

**Power Billing Demands**

- (1) Supplementary Power Billing Demand shall be the higher of:
  - (a) The Supplementary Power Demand (if multiple Supplementary Power Demands are required due to the applicable standard rate schedule, they shall be combined as specified by that rate schedule), or
  - (b) Any minimum demand provisions of the applicable standard rate schedule.
- (2) Maintenance Power Billing Demand shall be the Maintenance Power Demand.
- (3) Standby Power Billing Demand shall be the higher of:
  - (a) The Standby Power Demand, or
  - (C) (b) 65% of the Standby Power Agreement Capacity.

**Customer's Reactive Kilovolt-Ampere Demands**

The customer's maximum fifteen-minute leading or lagging kilovolt-ampere demand shall be apportioned among the various types of service utilized under this schedule in proportion to the customer's kilowatt portion of Supplementary Power Demand, Maintenance Power Demand, and Standby Power Demand.

**DETERMINATION OF ENERGY USE**

- (1) Supplementary Energy Use shall be the lesser of:
    - (a) The average kilowatt demand during those portions of the billing period when no Maintenance Power or Standby Power is used, or the kilowatt portion of the Supplementary Power Demand if no demand intervals without the use of Maintenance or Standby Power exist in the billing period, multiplied by the quantity (total number of demand intervals in the billing period ÷ demand intervals per hour).
    - (b) The total kilowatthour use.
  - (2) Maintenance Energy Use and Standby Energy Use shall be determined by apportioning the total kilowatthour use less the Supplementary Energy Use in proportion to the products of the power demands and the number of hours that the Maintenance or Standby Power is used.
- (C) Denotes Change

Issued by Authority of an Order  
of the Public Service Commission of West Virginia  
in Case No. 94-0035-E-42-T, dated November 9, 1994

**ALTERNATIVE GENERATION SCHEDULE  
SCHEDULE "AGS"**

FACILITIES

Any facilities that are installed by the Company solely to provide Standby Power or Maintenance Power service and which have not been included in the customer's interconnection costs are installed at the customer's expense. The customer is responsible for the total cost of construction plus a monthly maintenance charge for those facilities. Any facilities, including relays and their settings, installed by customer for the purpose of connecting to the Company must be specifically approved by the Company prior to the connection being made and must be subject to the Company's continuing approval.

DATA

The customer shall furnish such detailed load data and data on outages as the Company shall, from time to time, require, together with such supporting documentation as the Company shall request, in order for the Company to collect data and prepare reports as may be required.

LOCAL TAX ADJUSTMENT

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

(N) ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

ENVIRONMENTAL CONTROL CHARGE

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

TERM

Not less than one year.

GENERAL

Rates and provisions are subject to "Rules and Regulations for Electric Service."

**OPPORTUNITY POWER SERVICE RIDER**

AVAILABILITY

This Rider is available to firm power customers served by the Company on either rate schedule "K" or "P," that have short-term opportunities that would require increases in their electrical power purchases. To be eligible for service under this schedule, both Company and Customer must have, in Company's sole judgment, adequate electrical facilities already in place to accommodate the additional load. Opportunity Power scheduled hereunder shall be provided and billed in addition to that power provided under the terms of an existing firm power Electric Service Agreement.

Service under this Rider shall not be available for standby or maintenance service such as that required for Alternative Generation Facilities. An Opportunity Power Service Agreement shall be executed.

GENERAL DESCRIPTION

Opportunity Power purchases may be scheduled in multiple daily levels, the first of which shall be a minimum of 2000 kilovolt-amperes. Additional larger Opportunity Power purchases may be scheduled and billed separately in 1000 kilovolt-ampere increments.

Opportunity Power purchases shall be subject to a demand charge prorated at 4% per day (not to exceed 100% per month) based on the scheduled load and the corresponding number of days during the billing period that such service was supplied. The Opportunity Power demand created and billed will not affect the rate schedule billing demand of any succeeding billing period. Energy consumed under the provisions of this Rider shall be billed in accordance with the applicable rate schedule.

All Opportunity Power supplied under this schedule shall be made available to customers solely at the Company's discretion, based on availability, and shall be interruptible, upon 10 minutes notice, for emergency and maintenance purposes and for generation and transmission deficiencies and peak shaving. A penalty shall be assessed for each occurrence in which a customer purchasing Opportunity Power is requested to interrupt that purchase and fails to do so.

TERMS

As provided in the executed Opportunity Power Service Agreement.

**EXPERIMENTAL SHOULDER-PEAK RIDER**

AVAILABILITY

This Rider is available to Customers on Rate Schedules "K" and "P" when in Company's sole judgment adequate electrical facilities are in place to serve Customer.

GENERAL DESCRIPTION

For purposes of this Rider, the shoulder-peak hours for the months of April and May shall include the hours from 7:00 a.m. to 9:00 a.m., and from 5:00 p.m. to 10:00 p.m. Monday through Saturday. Shoulder-peak hours for the months of June through September shall include the hours from 7:00 a.m. to 12:00 Noon, and from 8:00 p.m. to 10:00 p.m. Monday through Saturday. Customers must contract in advance for capacity under this Rider. The minimum capacity contracted for in excess of on-peak demand under this Rider shall be 2,000 kilovolt-amperes. The shoulder-peak capacity in excess of on-peak demand is subject to interruption upon two (2) hours notice for emergency and maintenance purposes and for generation and transmission deficiencies and peak-shaving. Loads not interrupted upon notice will be counted as on-peak load under standard provisions of the rate schedule serving the Customer.

For Customers taking service under this experimental Rider, the on-peak period shall be as defined in the rate schedule but shall exclude the shoulder-peak hours as contained herein. For such service, the billing demand for the month shall be the maximum demand measured during on-peak hours plus 15% of the excess of the maximum off-peak or shoulder-peak demand, whichever is greater, over such on-peak demand, but in no case shall be less than the demand provisions listed in the rate schedule.

TERMS

As provided in the executed Experimental Shoulder-Peak Rider Agreement. This Rider may be withdrawn upon 30 days written notice to the Public Service Commission of West Virginia and Customers contracting for service under this Rider, and individual Customer contracts may be canceled with a similar notice by either party.

LOCAL TAX ADJUSTMENT

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 Rules and Regulations for Electric Service, there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

(N) ENVIRONMENTAL CONTROL CHARGE NORMALIZATION SURCHARGE

An Environmental Control Charge Normalization Surcharge shall apply, as outlined on Sheet No. 5F1 of this tariff.

ENVIRONMENTAL CONTROL CHARGE

An Environmental Control Charge shall apply, as outlined on Sheet No. 5G1 of this tariff.

TERMS OF PAYMENT

Bills are due and payable on presentation. A late payment charge of 2% will be added to each bill not paid in full within twenty (20) days from the date mailed.

TERM

Short Term

Short Term Service having an initial term of thirty (30) days is available if the Customer makes an initial payment of the cost of installation and removal of the luminaire and bracket in addition to any other payments required under "CONDITIONS" below. This initial payment shall be refundable with interest if the lighting system remains in service for five years. After the initial term, the Agreement shall remain in effect until canceled by either party with not less than thirty (30) days prior written notice of cancellation.

Long Term

Long Term Service having an initial term of ten years is available and monthly rate as set forth in this schedule shall be reduced by fifty cents per lamp. After the initial term, the Agreement shall remain in effect until canceled by either party with not less than 90 days prior written notice of cancellation.

CONDITIONS

STANDARD SYSTEMS

Overhead Service

Facilities shall consist of:

1. Standard overhead, horizontal luminaire (cobra head) and photoelectric control mounted on a luminaire bracket.
2. Standard vertical open lens luminaire ("OL") and photoelectric control mounted on a luminaire bracket.
3. Standard floodlighting luminaire with photoelectric control and an adjustable mounting bracket.

Luminaire is mounted on an existing Company-owned or approved pole.

Underground Service

Facilities shall consist of:

1. Standard colonial post top luminaire, a photoelectric control and a direct buried fiberglass pole approximately 14 feet in height.
2. Standard overhead, horizontal luminaire (cobra head), a photoelectric control and a direct buried fiberglass pole approximately 30 feet in height.
3. Standard rectangular enclosed luminaire, a photoelectric control and a square steel pole approximately 30 feet in height mounted on a non-concrete power installed foundation.
4. Standard rectangular enclosed area (galleria) luminaire, a photoelectric control and a square steel pole approximately 40 feet in height. The base foundation is normally provided by the Customer.

President

Effective: January 15, 2008

**OUTDOOR LIGHTING  
EQUIPMENT, MAINTENANCE AND UNMETERED SERVICE  
SCHEDULE EMU**

(Continued)

When required, the Customer is responsible for the costs associated with furnishing and installing any concrete bases for poles.

Underground service will be installed where service is supplied from an existing underground distribution system. Where the point of connection for secondary service to the luminaire is not located within three feet of the pole, Customer shall pay the Company's installed cost and be responsible for the Company's maintenance cost of any extra facilities required to provide underground secondary service.

The Customer shall pay for or, at the option of the Company, provide any conduit, excavating, backfilling, reconstructing and resurfacing necessary for the installation and maintenance of the underground cable.

**General**

All costs described in this schedule are actual costs or, where applicable, estimates based on standard engineering practice.

The installed cost of any facilities required to extend service and the cost of rearranging facilities necessary to serve luminaires or to obtain required mounting height is paid by customer. Payment plans can be arranged with Company.

In the event of early termination for any reason prior to expiration of the initial term of the agreement, Customer shall pay either the balance of the agreement responsibility, less applicable energy charge, or the cost of installation and removal of equipment, whichever is less. Any remaining balance due for extra facilities, rearranging of facilities or other additional installed costs which were separately billed over the term of the agreement shall also become immediately due and payable.

All Customer charges are subject to any applicable local, state and federal taxes.

Company shall not be liable for damages to the Customer for any failure in any lighting system which results from any cause beyond the Company's control.

**Company Responsibilities**

Company will, at its own cost, install, operate, and maintain its standard outdoor lighting equipment with unmetered service.

Company will replace burned-out lamps and otherwise maintain the equipment during regular daytime working hours as soon as practicable following notification by Customer.

Company shall furnish luminaires at additional locations in accordance with Company practices upon the written order of Customer; Company shall increase size of any luminaire in the same Rate Schedule upon written order of Customer.

Company shall change the location of any luminaire furnished under Agreement, upon written order of Customer if said change does not require the extension of lines or the erection of poles, but Company shall not be required to make more than one change in the location of any one luminaire during term Agreement is in effect.

Issued November 25, 1997

Issued by  
Michael P. Morrell  
Vice President

Effective November 26, 1997

**OUTDOOR LIGHTING  
EQUIPMENT, MAINTENANCE AND UNMETERED SERVICE  
SCHEDULE EMU**

(Continued)

Customer Responsibilities

Customer shall provide to Company free of cost and with free access, a satisfactory right-of-way and location for Company's facilities necessary to supply service on premises controlled by Customer. Facilities provided at Company's expense shall remain Company property.

Customer shall be responsible for selecting the lamp size and location of the luminaire which shall be in conformance with applicable safety standards and governmental regulations. Customer shall obtain appropriate approval for luminaires to be located on public thoroughfares.

Customer shall be responsible for reporting non-operating lighting systems to the Company.

Municipal Installations

Company will provide bridge lighting when Customer installs and maintains luminaire supports and conduit for the supply line. Company shall furnish and maintain luminaire and conductors and will provide energy and lamp replacements.

Municipal Customer shall furnish Company a certified map, showing the location and size of each luminaire included in the initial installation provided for in the agreement. Company shall install said luminaires as designated. Upon prior arrangement, Company will prepare a map for customer approval for an additional cost.

**SPECIAL SYSTEMS**

General

Company will provide non-standard underground, ornamental and other special lighting systems when the additional installed cost in excess of the estimated cost of a standard lighting system for the same application is paid by Customer. In this case, Customer shall pay the standard service rate. Company shall take title to the special system and shall operate and maintain the facilities. Customer shall be responsible for all damages to or loss of special lighting system unless due to the negligence of the Company.

The additional installed cost of a special lighting system in excess of the estimated cost of a standard lighting system is paid by the Customer. Payment plans can be arranged with Company.

In the event of early termination for any reason, prior to expiration of the initial term of the agreement, Customer shall pay either the balance of the agreement responsibility, less applicable energy charge, or the cost of installation and removal of equipment, whichever is less. Any remaining balance due for extra facilities, rearranging of facilities or other additional installed costs which were separately billed over the term of the agreement shall also become immediately due and payable.

The Company shall have the sole, complete and final authority to determine the operating lifetime, or remaining operating lifetime, of the special lighting system or any of its component parts. The operating lifetime of the special lighting system shall not be less than twenty (20) years from the date of installation. Upon the determination of the Company that the operating lifetime of the special lighting system or any of its component parts has expired, the Company shall give written notice of the same to the Customer. Upon receipt of such written notification, Customer shall elect either to replace or to de-energize the special lighting system or its applicable component part. Customer shall give written notice of such election to the Company.

Issued November 25, 1997

Issued by  
Michael P. Morrell  
Vice President

Effective November 26, 1997

**OUTDOOR LIGHTING  
EQUIPMENT, MAINTENANCE AND UNMETERED SERVICE  
SCHEDULE EMU  
(Concluded)**

In the event Customer elects to replace the special lighting system or any component part thereof, Customer shall pay the Company the additional installed cost of the replacement system or component part thereof plus removal cost of the existing system. The additional installed cost of the system or component part thereof is defined as the total cost of the system or component part thereof as installed less the installed cost of the standard luminaires and brackets which would have been required had the system been the Company's standard lighting system.

If the Customer elects to de-energize the special lighting system and/or component part thereof, the Company shall de-energize the same. Upon the written request of the Customer, Company shall remove the de-energized system or component part thereof. Such removal shall be at the Customer's expense.

In the event Customer does not give Company written notice of its election within six (6) months after notification by the Company, the Company shall de-energize the special lighting system or its applicable component part. Upon Customer's written request, Company shall remove the de-energized system or component part thereof. Such removal shall be at Customer's expense.

**Company Responsibilities**

At the termination, for any reason, of the useful life of the special lighting system or designated components of the special lighting system, a new system or component shall be installed under similar Agreement conditions.

Company shall change the location of any special lighting system upon the written request of the Customer. Customer shall pay the Company the total relocation cost of the same.

**Customer Responsibilities**

Customer shall be responsible for all costs and expenses of trenching, backfilling all trenches and for repaving, repairing or replacing any roadways, walkways, vegetation or other physical objects damaged, destroyed or displaced by construction necessary for the installation and maintenance of the special lighting system or any of its component parts.

Customer shall reimburse the Company for total costs, less cost of standard luminaire and bracket, incurred by the Company as a result of any damage, destruction or cost of repairs to the system or any component part thereof from any cause, excepting Company's negligence. However, in the event that the lighting system or any component part thereof, excluding luminaire and bracket, is damaged or destroyed by the negligent or willful acts of third parties, prior to billing Customer for the items so damaged or destroyed, Company shall first reasonably attempt to collect the costs of replacements or repair from the third party responsible and shall certify to the Customer that such attempts have been made and that the said third party has not paid for such damages or destruction and is not likely to respond with such payment in a reasonable manner. This provision is not intended to compel the Company to enter legal action against the third party responsible prior to billing Customer, determination as to such procedure being within the sole determination of the Company.

**CONTRACT**

Company standard form of Outdoor Lighting Agreement shall be executed, when appropriate, along with applicable map showing location and size of all luminaires.

 President

Effective: January 1, 2010

**OUTDOOR LIGHTING  
MAINTENANCE AND UNMETERED SERVICE  
SCHEDULE MU**

(Continued)

**TERMS**

Initial term of the Agreement shall be one year. After the initial term, the Agreement shall remain in effect until a 30-day written notice of cancellation is provided and, unless Customer provides specific date in writing more than 30 days in the future, upon the expiration of 30 days.

**CONDITIONS**

Company will furnish energy and maintenance service to approved high pressure sodium, mercury vapor, metal halide, and incandescent outdoor lighting facilities. A full description of Customer's proposed equipment shall be submitted in writing by the Customer prior to Customer's furnishing the equipment to the Company.

All equipment supplied by Customer for placement on Company's poles will be installed by Company at Customer's expense. Customer shall at no time enter upon Company's electric facilities in any manner. All maintenance and any other repair of equipment on Company poles shall be performed by Company.

Where outdoor lighting system (including supporting poles) is wholly owned by Customer, the Customer is responsible for furnishing and installing all outdoor lighting equipment. Installation of outdoor lighting equipment may be performed by Company upon prior arrangement at Customer's sole cost. All Customer-owned equipment must be installed prior to connection to Company's service circuits. All subsequent changes, removals or additions must first be approved by the Company.

The monthly rate provided in this Schedule shall include standard maintenance, which shall be limited to scheduled cleaning and normal lamp and photoelectric control replacement not caused by vandalism or accident involving a third party. In the event that maintenance beyond standard maintenance is necessary, the Customer will be charged for time, materials and other costs required to do said maintenance. For Customer-owned equipment on Customer-owned poles, any maintenance beyond the standard maintenance provided by this Schedule may be performed by Customer; however, upon prior arrangement, the Company will perform such maintenance on a time and materials cost basis or previously agreed upon firm contract price.

Customer shall be responsible for reporting any outages or malfunctions of any outdoor light installed under this Schedule. The Company will provide appropriate maintenance as soon as practicable upon notification by Customer.

Customer shall furnish Company a certified map showing the location and size of each luminaire included in the initial installation provided for in this Agreement; however, upon prior arrangement the Company will prepare a map for customer approval for an additional cost.

Company shall change the location of any luminaire furnished under this Agreement upon written order of Customer. All costs associated with such change shall be paid by Customer.

Company shall not be liable for any direct, consequential and special damages to the Customer for any failure in lighting which results from any cause beyond the Company's control.

Company's approval of the Customer's facilities indicates only that the facilities are compatible with Company's system. Company's approval will not be construed to mean that the Customer's facilities are adequate or comply with any code or standard relating to lighting or illumination, or relating to the placement of lighting or illumination, such matters being the sole responsibility of the customer. Customer agrees to hold harmless the Company for any liability or threat of liability by third parties relating to the placement of or adequacy of Customer's facilities.

Company does not make, and Company hereby excludes, any and all implied warranties of merchantability and warranties of fitness of the electrical service provided by Company.

Costs of additional or special facilities provided hereunder shall be the responsibility of and shall be paid by Customer. Customer shall reimburse Company for the costs of said additional or special facilities either prior to said installation or via payment plans arranged with the Company.

Issued November 25, 1997

Issued by  
Michael P. Morrell  
Vice President

Effective November 26, 1997

**OUTDOOR LIGHTING  
MAINTENANCE AND UNMETERED SERVICE  
SCHEDULE MU  
(Concluded)**

**CONTRIBUTION IN AID OF CONSTRUCTION**

A charge will be made to the Customer in the amount of the estimated cost to the Company for installing all necessary facilities to provide service to the Customer's outdoor lighting system. Also, the Customer will be charged the estimated cost for any alterations or adjustments to the existing overhead or underground lines necessary to provide adequate clearance or spacing for the outdoor lighting system.

All Customer charges are subject to any applicable local, state, and federal taxes.

All cost estimates are based on standard engineering practice.

**CONNECTION/DISCONNECTION FEE**

The fee for connecting or disconnecting a street light shall be \$15.00 per light with a \$40.00 minimum per trip. Any work required in addition to that of connecting or disconnecting luminaire will be charged to the Customer based on the estimated cost to do the work.

**EQUIPMENT REMOVAL AND REMOVAL CHARGES**

Removal of Customer-owned equipment from Company's poles shall be performed by Company at Customer's sole cost. Company shall have the right to determine that Customer-owned equipment on its poles has become so obsolete, worn, damaged or hazardous that it must be removed.

Removal of Customer-owned lighting equipment from Customer-owned poles or removal of Customer-owned lighting equipment and poles may be performed by Company upon prior arrangement at Customer's sole cost.

**CONTRACT**

Company Standard Form of Outdoor Lighting Energy and Maintenance Agreement shall be executed, when appropriate, along with applicable map showing location and size of all luminaires.

LOCAL TAX ADJUSTMENT

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 "Rules and Regulations for Electric Service," there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

TERMS OF PAYMENT

Bills are due and payable on presentation. A late payment charge of 2% will be added to each bill not paid in full within twenty (20) days from the date mailed.

TERMS

Short Term

Short Term Service having an initial term of thirty (30) days is available if the Customer makes an initial payment of the cost of installation, and removal of the luminaire and bracket in addition to any other payments required under "CONDITIONS" below. This initial payment shall be refundable, with interest, if the lighting system remains in service for five years. After the initial term, the Agreement shall remain in effect until canceled by either party with not less than thirty (30) days prior written notice of cancellation.

<sup>1</sup>With base includes the installation of a non-concrete power installed foundation where soil conditions warrant its application.

(I) Denotes Increase

Issued by Authority of an Order  
 of the Public Service Commission of West Virginia  
 in Case Nos. 06-0960-E-42T and 06-1426-E-D, dated December 12, 2008

Issued: December 22, 2008

Issued by  
 D. W. McDonald  
 Vice President

Effective: December 15, 2008

**OUTDOOR LIGHTING  
EQUIPMENT AND MAINTENANCE SERVICE  
SCHEDULE EM**

(Continued)

Long Term

Long Term Service having an initial term of ten (10) years is available and monthly rate as set forth in this schedule shall be reduced by fifty cents per lamp. After the initial term, the Agreement shall remain in effect until canceled by either party with not less than ninety (90) days prior written notice of cancellation. Municipal lighting service is typically provided under long term agreement for initial and supplemental installation.

CONDITIONS

STANDARD SYSTEMS

Overhead Service

Facilities shall consist of:

1. Standard overhead, horizontal luminaire (cobra head) and photoelectric control mounted on a luminaire bracket.
2. Standard vertical open lens luminaire ("OL") and photoelectric control mounted on a luminaire bracket.
3. Standard floodlighting luminaire with photoelectric control and an adjustable mounting bracket.

Luminaire is mounted on an existing Company-owned or approved pole.

Underground Service

Facilities shall consist of:

1. Standard colonial post top luminaire, a photoelectric control and a direct buried fiberglass pole approximately 14 feet in height.
2. Standard overhead, horizontal roadway luminaire (cobra head), a photoelectric control and a direct buried fiberglass pole approximately 30 feet in height.
3. Standard rectangular enclosed luminaire, a photoelectric control and a square steel pole approximately 30 feet in height mounted on a non-concrete power installed foundation.
4. Standard rectangular enclosed area (galleria) luminaire, a photoelectric control and a square steel pole approximately 40 feet in height. The base foundation is normally provided by the Customer.

When required, the Customer is responsible for the costs associated with furnishing and installing any concrete bases for poles.

Underground service will be installed where service is supplied from an existing underground distribution system. Where the point of connection for secondary service to the luminaire is not located within three feet of the pole, Customer shall pay the Company's installed cost and be responsible for the Company's maintenance cost of any extra facilities required to provide underground secondary service.

The Customer shall pay for or, at the option of the Company, provide any conduit, excavating, backfilling, reconstructing and resurfacing necessary for the installation and maintenance of the underground cable.

Michael P. Morrell  
Vice President

Effective November 26, 1997

**OUTDOOR LIGHTING  
EQUIPMENT AND MAINTENANCE SERVICE  
SCHEDULE EM**

(Continued)

General

All costs described in this schedule are actual costs or, where applicable, estimates based on standard engineering practice.

The installed cost, of any facilities required to extend service and the cost of rearranging facilities necessary to serve luminaires or to obtain required mounting height is paid by Customer. Payment plans can be arranged with Company.

In the event of early termination for any reason, prior to expiration of the initial term of the agreement, Customer shall pay either the balance of the agreement responsibility or the cost of installation and removal of equipment, whichever is less. Any remaining balance due for extra facilities, rearranging of facilities or other additional installed costs which were separately billed over the term of the agreement shall also become immediately due and payable.

All Customer charges are subject to any applicable local, state and federal taxes.

Company shall not be liable for damages to the Customer for any failure in any lighting system which results from any cause beyond the Company's control.

Company Responsibilities

Company will, at its own cost, install, and maintain its standard outdoor lighting equipment. Energy is supplied by Customer's metered service.

Company will replace burned-out lamps and otherwise maintain the equipment during regular daytime working hours as soon as practicable following notification by Customer.

Company shall furnish luminaires at additional locations in accordance with Company practices upon the written order of Customer; Company shall increase size of any luminaire in the same Rate Schedule upon written order of Customer.

Company shall change the location of any luminaire furnished under Agreement, upon written order of Customer if said change does not require the extension of lines or the erection of poles, but Company shall not be required to make more than one change in the location of any one luminaire during term Agreement is in effect.

Customer Responsibilities

Customer shall provide to Company free of cost and with free access, a satisfactory right-of-way and location for Company's facilities necessary to supply service on premises controlled by Customer. Facilities provided at Company's expense shall remain Company property.

Customer shall be responsible for selecting the lamp size and location of the luminaire which shall be in conformance with applicable safety standards and governmental regulations. Customer shall obtain appropriate approval for luminaires to be located on public thoroughfares.

Customer shall be responsible for reporting non-operating lighting systems to the Company.

Municipal Installations

Municipal Customer shall furnish Company a certified map, showing the location and size of each luminaire included in the initial installation provided for in the agreement. Company shall install said luminaire as designated. Upon prior arrangement, Company will prepare a map for customers approval for an additional cost.

**OUTDOOR LIGHTING  
EQUIPMENT AND MAINTENANCE SERVICE  
SCHEDULE EM**

(Continued)

**SPECIAL SYSTEMS**

General

Company will provide non-standard underground, ornamental and other special lighting systems when the additional installed cost in excess of the estimated cost of a standard lighting system for the same application is paid by Customer. In this case, Customer shall pay the standard service rate. Company shall take title to the special system and shall operate and maintain the facilities. Customer shall be responsible for all damages to or loss of special lighting system unless due to the negligence of the Company.

The additional installed cost of a special lighting system in excess of the estimated cost of a standard lighting system is paid by Customer. Payment plans can be arranged with Company.

In the event of early termination for any reason, prior to expiration of the initial term of the agreement, Customer shall pay either the balance of the agreement responsibility or the cost of installation and removal of equipment, whichever is less. Any remaining balance due for extra facilities, rearranging of facilities or other additional installed costs which were separately billed over the term of the agreement shall also become immediately due and payable.

The Company shall have the sole, complete and final authority to determine the operating lifetime, or remaining operating lifetime, of the special lighting system or any of its component parts. The operating lifetime of the special lighting system shall not be less than twenty (20) years from the date of installation. Upon the determination of the Company that the operating lifetime of the special lighting system or any of its component parts has expired, the Company shall give written notice of the same to the Customer. Upon receipt of such written notification, Customer shall elect either to replace or to de-energize the special lighting system or its applicable component part. Customer shall give written notice of such election to the Company.

In the event Customer elects to replace the special lighting system or any component part thereof, Customer shall pay the Company the additional installed cost of the replacement system or component part thereof plus removal cost of the existing system. The additional installed cost of the system or component part thereof is defined as the total cost of the system or component part thereof as installed less the installed cost of the standard luminaires and brackets which would have been required had the system been the Company's standard lighting system.

If the Customer elects to de-energize the special lighting system and/or component part thereof, the Company shall de-energize the same. Upon the written request of the Customer, Company shall remove the de-energized system or component part thereof. Such removal shall be at the Customer's expense.

In the event Customer does not give Company written notice of its election within six (6) months after notification by the Company, the Company shall de-energize the special lighting system or its applicable component part. Upon Customer's written request, Company shall remove the de-energized system or component part thereof. Such removal shall be at Customer's expense.

Company Responsibilities

At the termination, for any reason, of the useful life of the special lighting system or designated components of the special lighting system, a new system or component shall be installed under similar Agreement conditions.

Company shall change the location of any special lighting system upon the written request of the Customer. Customer shall pay the Company the total relocation cost of the same.

Issued November 25, 1997

Issued by  
Michael P. Morrell  
Vice President

Effective November 26, 1997

**OUTDOOR LIGHTING  
EQUIPMENT AND MAINTENANCE  
SCHEDULE EM  
(Concluded)**

Customer Responsibilities

Customer shall be responsible for all costs and expenses of trenching, backfilling all trenches and for repaving, repairing or replacing any roadways, walkways, vegetation or other physical objects damaged, destroyed or displaced by construction necessary for the installation and maintenance of the special lighting system or any of its component parts.

Customer shall reimburse the Company for total costs, less cost of standard luminaire and bracket, incurred by the Company as a result of any damage, destruction or cost of repairs to the system or any component part thereof from any cause, excepting Company's negligence. However, in the event that the lighting system or any component part thereof, excluding luminaire and bracket, is damaged or destroyed by the negligent or willful acts of third parties, prior to billing Customer for the items so damaged or destroyed Company shall first reasonably attempt to collect the costs of replacements or repair from the third party responsible and shall certify to the Customer that such attempts have been made and that the said third party has not paid for such damages or destruction and is not likely to respond with such payment in a reasonable manner. This provision is not intended to compel the Company to enter legal action against the third party responsible prior to billing Customer, determination as to such procedure being within the sole determination of the Company.

CONTRACT

Company standard form of Outdoor Lighting Agreement shall be executed, when appropriate, along with applicable map showing location and size of all luminaires.

Issued by  
Michael P. Morrell  
Vice President

Effective November 26, 1997

**SURGE SUPPRESSION SERVICE  
SCHEDULE PQ**

AVAILABILITY

Available for single phase connections that are directly metered and are served at less than 250 volts. Surge suppression equipment consists of a base unit that is attached to Customer's service between the meter and meter socket and may include one or more surge suppression plug strips for indoor use. Equipment may also include special surge suppression devices for use with communication and CATV and digital satellite systems (DSS). Connection must be directly metered (i.e., not utilizing metering transformers). The meter and meter socket must be sufficiently accessible for installation of the surge suppression equipment. Company reserves the right to decline surge protection service to customers with hazardous or substandard service entrances.

MONTHLY RATES FOR SURGE SUPPRESSION SERVICE

Base unit.....	\$4.75 Net
One plug strip with telephone or coax connector.....	\$2.10 Net
Additional plug strips .....	\$2.10 Net
Satellite unit (DSS).....	\$2.60 Net
Each additional DSS strip .....	\$2.60 Net

Local Tax Adjustment

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 'Rules and Regulation for Electric Service,' there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

Terms of Payment

Bills are due and payable on presentation. A late payment charge of 2% will be added to each bill not paid in full within twenty (20) days from the date mailed.

TERM

One year for meter socket protection equipment and strip surge protection equipment.

GENERAL

Company will install all meter base unit surge suppression equipment. Other surge suppression equipment (plug-in strip suppression equipment) will be mailed to Customer within four to six weeks. Detailed installation instructions and assistance, where needed, will also be provided by Company. All surge suppression equipment listed above is warranted against damage by the manufacturer under specific circumstances. Customer's equipment protected by surge suppression equipment is also warranted against damage within published limits. Customer must comply with installation instructions (including grounding requirements) to activate warranty.

Should customer wish to terminate use of surge protection service, Customer will notify Company of his intent. Company will remove equipment and cease billing for the service upon removal of the base unit and receipt of any Company owned plug strip surge suppression equipment from Customer's premises.

Customer must meet credit standards.

Plug-in strip surge suppression equipment will also include a six (6) foot length of phone cord or coaxial cable (as appropriate.)

**Schedule LIT, OUTDOOR LIGHTING SERVICE (CIS RATE CODE 300)  
 ELECTRIC**

1. APPLICABILITY

This schedule is applicable to any customer for outdoor lighting service except where installations are prevented by any public authority having jurisdiction or are otherwise unlawful. Available only for installations served prior to January 1, 2003.

(I) 2. MONTHLY RATE

A. Watchlight, Area, and Roadway Lighting Service

Monthly kWh	Approximate Lumens	Type	Rate per Unit Per Month
40	3,300	Mercury Vapor	\$10.28
70	7,000	Mercury Vapor	\$11.59
100	11,000 *	Mercury Vapor	\$13.25
150	20,000	Mercury Vapor	\$17.74
360	53,000 *	Mercury Vapor	\$34.38
30	5,000	Sodium Vapor	\$12.72
40	8,000	Sodium Vapor	\$13.23
70	14,000	Sodium Vapor	\$15.34
105	23,000	Sodium Vapor	\$20.21
160	42,000	Sodium Vapor	\$25.56
360	127,000	Sodium Vapor	\$41.43

\* These mercury vapor lamps will continue to be supplied at those locations being served as of May 29, 1981, at the rates set forth above. These mercury vapor lamps will not be supplied unless written commitments were made prior to May 29, 1981, and, if an existing mercury vapor lamp is discontinued at the customer's option, it shall not again be available. The Company will replace, at its own expense, mercury vapor lighting fixtures which fail, and which cannot be made operative, with Company standard high pressure sodium vapor fixtures of the Customer's choice. These will be billed at the appropriate rate for the fixture chosen. If the Customer prefers, the Company will remove the defective mercury vapor fixture at its own expense without replacement.

B. Ultra Style - Rectangular shaped luminaries which provide sharp cut-off light patterns along with decorative, environmental quality, applicable to Area and Roadway Lighting service.

Monthly kWh	Approximate Lumens	Type	Rate per Unit Per Month	
			1st Unit Per Pole	Each Additional Unit on Same Pole
30	5,000	Sodium Vapor	\$27.12	\$11.24
40	8,000	Sodium Vapor	\$27.60	\$11.57
70	14,000	Sodium Vapor	\$28.24	\$12.74
105	23,000	Sodium Vapor	\$30.86	\$17.28
160	42,000	Sodium Vapor	\$33.26	\$19.79

(N)

<b>Schedule LIT, OUTDOOR LIGHTING SERVICE (CIS RATE CODE 300, CONTINUED) ELECTRIC</b>
---

**TERM OF CONTRACT**

Open order where the fixtures and other service facilities are in place and for temporary service where connect and disconnect charge is made. In all other cases, the term of contract shall be such as may be mutually agreed upon, but no less than one year.

**3. TERMS AND CONDITIONS**

The complete installation is to be furnished, maintained and operated by the Company and will remain the property of the Company. The type of fixture and method of installation shall be in accordance with Company standards. Normally, overhead lights will be installed on Company wood poles. Installations on buildings or structures belonging to the Customer or to others will not be permitted. The Company shall not be obligated to construct or own any line extension or other facilities to provide outdoor lighting service, the cost of which shall exceed five times the net annual revenue anticipated from such line extension. (Gross revenue less energy portion of purchased power costs).

If the cost of installing the line extension or other facilities is in excess of five times the net annual revenue, the customer may be required to pay to the Company in advance of the construction of the extension or other facilities an amount equal to the excess cost.

Outside the areas designated by the Company as underground distribution areas, when the Company is requested by the Customer to install underground units for outdoor lighting service, the Company will make such an installation provided the Customer pays to the Company in advance the amount by which the cost of the installation exceeds five times the net annual revenue anticipated from the installation. The Customer, however, may be required to install, own and maintain all fixed items such as conduit, pads, handholds, and pole foundations. Poles will not be considered fixed items. Within the areas designated by the Company as underground distribution areas the Company shall not be obligated to construct or own any facilities beyond the property line of the Customer.

The Customer shall report to the Company, as promptly as possible, any and all lights that are out, not burning properly, or burning continuously. The Company will endeavor to replace or repair such lights on the next following regular working day. Should the Customer request the repair or replacement of the lights during hours other than the normal routine schedule, a service charge of \$28.00 will be made.

**ENERGY DATA SERVICES  
SCHEDULE EDS**

AVAILABILITY

Energy Data Services are available to any Customer requesting time interval energy data. Customer without an existing recording meter may acquire a recording meter under the terms of this tariff.

RATES

Monthly energy data files	\$ 6.95 / month/meter
Daily energy data files	\$29.95 / month/meter
Setup fee	\$99.00 / account

Customized file formats - Data will be made available in several standard formats that may change periodically as required to accommodate changes in technology, customer needs, etc. Customers may request a customized file format for a fee, however the Company reserves the right to deny the request. The Company will provide a cost estimate to perform requested customizations.

Energy data analysis - The Company may offer optional energy analysis solutions to the customer requesting Energy Data Services. Energy data analysis services will be provided at mutually agreed to prices but not less than the incremental costs to provide these services.

Recording meter installation - In addition to the charges above, the following meter charges apply to a Customer that does not qualify for a recording kilowatt meter according to the terms of the Rate Schedule under which the Customer receives electric service.

Monthly recording meter fee	\$34.25 / month / meter
One-time meter installation fee	\$572.00

LOCAL TAX ADJUSTMENTS

Within municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified in Rule No. 18 of "Rules and Regulations for Electric Service", there shall be added to the total bill a surcharge equal to the percentage shown on Sheet No. 5A.

TERMS OF PAYMENT

Bills are due and payable on presentation. A late payment charge of 2% of the net bill will be added to each bill not paid in full within twenty (20) days from the date mailed.

(N)

**ENERGY DATA SERVICES  
SCHEDULE EDS**

**TERM**

No term. The Company has the option to withdraw this service upon thirty (30) days written notice to the Customer.

**GENERAL**

Monthly service - The Company provides energy data in 15-minute, 30-minute or 60-minute increments. The data is updated once per month concurrent with the Customer's bill and posted to a password secured Internet site in a downloadable file format. The data is posted within 3 days of the customer's regularly scheduled meter read date subject to the Company's ability to render such service.

Daily service – The Company remotely reads the customer meter each business day and posts an energy data file to a password secured Internet site in a downloadable format. The data will be available in 15-minute, 30-minute or 60-minute increments. Data will be posted by 10 am each business day subject to the Company's ability to render such service.

The Customer is responsible to provide the hardware (computer and internet connection) necessary to retrieve the interval energy data.

**POWER QUALITY SERVICES RIDER**

AVAILABILITY

This Rider is available to all Customers served by the Company. A mutually acceptable Power Quality Services Agreement shall be executed.

GENERAL DESCRIPTION

When a Customer enters into a contract for Power Quality Services with the Company, the Company may provide the following products and services:

1. Perform diagnostic services to identify cause of disruption or power quality disturbances.
2. Perform engineering analyses and design to provide solution to mitigate or resolve problem.
3. Perform electrical system modifications and/or power conditioning equipment installation.
4. Perform maintenance of electrical or power conditioning systems.
5. Any other service or product provided for Power Quality reasons.

Power Quality Services provided under this Rider shall be in addition to Commission Rule 7 - Standards of Quality of Service.

CHARGES

Rates and contract provisions shall be established on a case-by-case basis and shall be sufficient to recover all appropriate incremental costs of the service and a contribution to fixed costs.

TERMS

Additional terms of the contract for Power Quality Services required under this Rider will be negotiated on a case-by-case basis.

GENERAL

Nothing in this Rider is intended to preclude a Customer from obtaining similar services from another provider.

**NET ENERGY METERING RIDER**

AVAILABILITY

This rider is available to residential and general service customers who own and operate an eligible electric generating facility designed to operate in parallel with the Company's system. Customers served under this tariff must also take service from the Company under the applicable standard service tariff. The total rated generating capacity of all customers served under this tariff shall be limited to one tenth of one percent (0.1%) of the Company's single hour peak load during the previous year.

CONDITIONS OF SERVICE

1. For the purposes of this tariff, an eligible customer-generator's electric generating facility must comply with all of the following requirements:
  - a. generates electricity using photovoltaic systems, biomass, fuel cell, hydro, methane field, and wind
  - b. has a rate capacity of not more than twenty-five (25) kW;
  - c. is owned and operated by the customer and is located on the customer's premises
  - d. is intended for the primary purpose of supplying all or part of the customer's own electricity requirements; and
  - e. is designed and installed to operate in parallel with the Company's electric distribution system without adversely affecting the operation of equipment and service of the Company and its customers and without presenting safety hazards to Company and customer personnel.
2. A Customer seeking to interconnect an eligible electric generating facility to the Company's system must submit to the Company's designated personnel a completed Interconnection Application, and a one-line diagram showing the configuration of the proposed net metering facility. The Company will provide copies of all applicable forms upon request.
3. An Interconnection Agreement between the Company and the eligible customer- generator must be executed before the net metering facility may be interconnected with the Company's system.
4. All generator equipment and installations must comply with the Company's Technical Requirements. All generator equipment shall be installed in accordance with the manufacturer's specifications as well as all applicable provisions of the National Electrical Code and state and local codes. All generator equipment and installations shall comply with all applicable safety, performance and power quality standards, established by the National Electrical Code, the Institute of Electrical and Electronic Engineers and accredited testing laboratories.
5. The Customer shall provide the Company proof of qualified installation of the net metering facility. Certification by a licensed electrician shall constitute acceptable proof.
6. The Customer shall install, operate, and maintain the electric generating facility in accordance with the manufacturer's suggested practices for safe, efficient, and reliable operation in parallel with the Company's system.
7. The Customer must provide a visibly open, lockable, manual disconnect switch, which is accessible by the Company and is clearly labeled.
8. The Company may, at its own discretion, isolate any electric generating facility if the Company has reason to believe that continued interconnection with the electric generating facility creates or contributes to a system of emergency.
9. The Company may perform reasonable on-site inspections to verify the proper installation and continuing safe operation of the net metering facility and the interconnection facilities, at reasonable times and upon reasonable advance notice to the net metering customer.

Issued by  
David E. Flitman  
President

Effective: February 1, 2007

(N)

**NET ENERGY METERING RIDER (Continued)**

10. A customer operating an electric generating facility shall maintain homeowners, commercial or other insurance providing coverage in the amount of at least one hundred thousand dollars (\$100,000) for the liability of the insured against losses or damages arising from the use of the customer's electric generating facility. The customer must submit evidence of such insurance to the Company with the Interconnection Application. The Company's receipt of evidence of liability insurance does not imply an endorsement of the terms and conditions of the coverage.
11. An eligible customer-generator installation is transferable to other persons or service locations only upon notification to the Company and verification that the installation is in compliance with all applicable safety and power quality standards. All other conditions of service apply.

**METERING**

Net energy metering shall be accomplished using a standard kilowatt-hour meter capable of measuring the flow of electricity in two (2) directions. If the existing electrical meter installed at the customer's facility is not capable of measuring the flow of electricity in two directions, the customer shall be responsible for all expense for the purchase and installation of an appropriate meter or meters with such capability. In the case where two meters are used, the reading of the meter measuring the flow of energy from the customer to the Company shall be subtracted from the reading of the meter measuring the flow of energy from the Company to the customer to obtain a measurement of net kWh for billing purposes.

**MONTHLY CHARGES**

Monthly charges for energy, and demand where applicable, to serve the customer's net or total load shall be determined according to the Company's standard service tariff under which the customer would otherwise be served, absent the customer's electric generating facility. Energy charges under the customer's standard tariff shall be applied to the customer's net energy for the billing period to the extent that the net energy exceeds zero. If the customer's net energy is zero or negative during the billing period, the customer shall pay only the non-energy charge portions of the standard tariff bill. If the customer's net energy is negative during a billing period, the customer shall be credited in the next billing period for the kWh difference. If time-of-day metering is used, energy flows in both directions shall be netted and accounted for at the specific time-of-use in accordance with the provisions of the customer's standard tariff and this Net Metering Service Tariff. When the customer elects no longer to take service under this Net Metering Service Tariff, any unused credit shall revert to the Company. Excess electricity credits are not transferable between customers or locations.

In no event shall the excess credit from a single month be carried forward beyond twelve (12) months as a credit against the current monthly bill.

**OTHER CHARGES**

The customer is responsible for all equipment and installation costs of the electric generating facility.

As specified in the Interconnection Application, the customer must pay for a non-refundable application fee of \$30.00. This fee includes the cost of inspection of the customer's electric generating facility if the Company deems such inspection is necessary.

Should the Company determine that an interconnection study is required; the Company will advise the customer of the estimated additional cost of performing such study. Upon payment by the customer of the estimated study costs, the Company will proceed with the interconnection study to determine if installation of the customer's electric generating facility will have significant impact on the Company's system.

(N)

**NET ENERGY METERING RIDER (Continued)**

Should construction or upgrades of the Company's system be required in order to interconnect the customer's electric generating facility, additional charges to cover costs incurred by the Company shall be determined by the Company and paid by the customer.

The customer shall pay any additional charges, as determined by the Company, for equipment, labor, metering, testing or Inspections requested by the customer.

**TERM OF CONTRACT**

Any contract required under this tariff shall be the same as that required under the customer's applicable standard service tariff.

**SPECIAL TERMS AND CONDITIONS**

This tariff is subject to the Company's Terms and Conditions of Service and all provisions of the standard service tariff under which the customer takes service.

**TECHNICAL REQUIREMENTS**

The technical requirements for interconnection of Net Metering Installations to the Company Distribution System are as follows: Interconnection enables the Net Metering Installation to operate in parallel with the Company Distribution System. An Interconnection Application Screening and Interconnection Study, as described in Company's Interconnection Procedures, are used to determine the impact of the Net Metering Installation on the Company Distribution System beyond the Point of Common Coupling.

The standard IEEE 1547, "Standard for Interconnecting Distributed Resources with Electric Power Systems", contains the majority of the technical requirements necessary for interconnection. IEEE 1547 is limited to an aggregate capacity of 10 MVA or less interconnected at typical primary and/or secondary voltages, IEEE 1547 does not address planning, designing, operating, or maintaining the utility's distribution system and it does not identify or address all of the potential system impact the proposed Net Metering Installation may create beyond the Point of Common Coupling. Due to the limitations of IEEE 1547, additional technical requirements are contained herein.

These Technical Requirements are supplementary to and do not intentionally conflict with or supersede applicable laws, ordinances, rules or regulations established by Federal, State and other governmental bodies. The Customer is responsible for conforming to all applicable laws, ordinances, rules or regulations established by Federal, State and other governmental bodies. Additional requirements for interconnection may be imposed by the Transmission System Operator to address Transmission System operating issues related to the proposed Net Metering Installation. Additional requirements may also be necessary to comply with the requirements of other approved tariffs associated with the Company or other third parties providing services.

Effective: February 1, 2007

(N)

**NET ENERGY METERING RIDER (Concluded)**

To assure that the safety, reliability and power quality of the Distribution system is not degraded by the interconnection of the Net Metering Installation:

- 1) The Net Metering Installation shall comply with the Technical Requirements stated herein.
- 2) Any Distribution System modifications and/or modifications to the Net Metering Installation identified by the Interconnection identified by the Interconnection Study, as described in the Interconnection Procedures, shall be completed.
- 3) The Net Metering Installation shall be operated and maintained as agreed upon by the parties.

The Net Metering Installation shall comply with the requirements specified in IEEE 1547, "Standard for Interconnecting Distributed Resources with Electric Power Systems" and other technical requirements stated herein.

IEEE publications are available from the Institute of Electrical and Electronics Engineers, 433 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331 (<http://standards.ieee.org>).

**EQUIPMENT DESIGN REQUIREMENTS**

Data for all major equipment proposed by the Customer to satisfy the Technical Requirements must be submitted for review and approval by the Company with the completed Interconnection Request. To facilitate review and approval, the Company will maintain a list of Pre-certified Equipment in accordance with the Commission's Rules. The Company's List of Pre-certified Equipment is available upon request and contains Pre-certified Equipment types, makes, and models of manufactured generating equipment and interconnection system components. This listing is based upon equipment certified by recognized national testing laboratories as suitable for interconnection with a distribution system based upon compliance with IEEE Standard 1547. Suitably for interconnection does not imply that Pre-certified Equipment may be interconnected without study to determine system impact.

The use of equipment that is not Pre-certified may delay the Company's review and approval of the Customer's design. All interconnection equipment must be approved by the Company prior to being connected to the Company's Distribution System and before parallel operation is allowed.

The interconnection system hardware and software design requirements in the Technical Requirements are intended to assure protection of the Company's Distribution System.

Any additional hardware and software necessary to protect equipment at the generation facility is solely the responsibility of the Customer to determine, design, and apply.
