LINE EXTENSION PLANS

SCHEDULE "LE"

AVAILABILITY

Service under this schedule is available throughout the entire territory served by the Company.

TERMS AND CONDITIONS GOVERNING EXTENSIONS OF FACILITIES

A. General

1. The extension of the Company's facilities for the supply of electric service to a Customer or a group of Customers requesting such extension will be made in accordance with this schedule.
2. The extension of the Company's distribution facilities, such as pole lines, underground lines, substations and transformers for the supplying of electric energy to a Customer or group of Customers, shall be built by the Company in accordance with its construction standards.
3. In calculating costs pursuant to this schedule, the Customer shall not be charged for any costs over those reasonably necessary to serve the Customer nor be required to share in any elective costs incurred by another Customer. The cost charged to the Customer shall exclude the cost of facilities specified in Commission Rule 5.6. Overhead costs may be added to the total extension cost only as provided for by the Uniform System of Accounts for Electric Utilities.
4. The Company will make application for the permits and acquire the easements necessary to build its supply facilities to the property occupied by the Customer and the Customer will apply for, obtain, and deliver to the Company all other permits or certificates necessary to give the Company the right to connect its conductors to the Customer's wiring and access for all other proper purposes, including a satisfactory easement from the land owner for the Company's facilities on the property occupied by the Customer. The Company shall not be required to obtain permits or to acquire any easement on, over or under the property of another necessary for service if the terms thereof are unduly burdensome. The Company will make a reasonable effort to obtain right-of-way, but when necessary, the Company shall ask the Customer to assist the Company in obtaining right-of-way. The Company and Customer will share equally in the costs of all rights-of-way and crossing permits secured either by purchase or condemnation. The Customer's share of such costs shall be included in the total estimated costs of the extension. Electric service will be supplied within a reasonable time after all necessary permits, certificates and easements have been obtained.
5. When the Customer and/or Company is unable to obtain the best right-of-way consistent with standard engineering practices, the Company shall be required to choose the more economically feasible option of undertaking condemnation or providing service to the Customer by an alternate route.

LINE EXTENSION PLANS

SCHEDULE "LE"

A. General (continued)

6. Any extension financed in whole or in part by Customers will become the property of the Company and every Customer participating in the financing will agree that the ownership of the line extension is vested in the Company.
7. Sale of the premises covered by an agreement in which the Customer has chosen to finance their share of the cost of a line extension through a monthly surcharge shall not relieve the Customer from the terms of that agreement, but the agreement may be assigned to the new Customer upon consent of the new Customer. Provided, however, that should the Company be required to make an investment in permanent facilities to serve the new Customer, this provision may be subject to modification, or conditioned upon an appropriate agreement to assure reasonable compensation for such investment.
8. The Customer shall supply the Company with drawings and specifications covering the plot and buildings to be supplied with service in reasonable time to prepare an electrical layout, make cost estimates and install required facilities.
9. After consulting with the Customer, the Company will determine the location of service facilities, locating the point of origin and termination so as to result in the lowest reasonable construction and operation costs. The Company reserves the right to extend facilities to the closest corner of the Customer's building.
10. Nothing contained herein shall be construed to prohibit the Company from making an extension under different arrangements, providing the foregoing extension rules are fully explained to the Customer, the alternate arrangements are by mutual agreement, and like arrangements are made to other Customers under similar conditions. Such alternate arrangements may include Customer provided work, such as right-of-way clearing, to be performed to reasonable Company specifications. Such arrangements shall not be contrary to Commission's Rule 10.2.
11. Additional details for overhead and underground service installation requirements governing such items as conditions for permanent service, service entrances, and meter installations are in the Company's Commission-approved "Customer Requirements for Electric Service".

B. Underground Service

When the Customer requests and the Company finds it practical to do so, the Company will provide underground service under the following conditions:

1. Underground extension to the Company's distribution system will be located along public roadways which the Company has a legal right to occupy or on public lands and private property across which satisfactory right-of-way or easements may be obtained. The Company shall not be required to provide rear-lot construction to any Customer.

Effective: January 29, 2009

(N)

LINE EXTENSION PLANS

SCHEDULE "LE"

B. Underground Service (continued)

2. The Customer shall, at their expense, clear the underground service route of trees, stumps and other obstructions and must rough grade it to within six inches (6") of final grade before the Company will begin construction. Such clearance and grading must be maintained. If the Customer desires to change the grade at a future date in a manner which requires relocation or change in the Company's facilities, such Customer shall pay the cost of the relocation or change.
3. The Company reserves the right to install overhead facilities when the terrain is unsuitable for standard underground construction equipment such as wet, unstable or rocky conditions or when the final grade level exceeds one (1) foot vertically for each four (4) feet measured horizontally.
4. The Customer shall cooperate with the Company to avoid unnecessary costs. Such cooperation shall include keeping the route of the lines clear of machinery and other obstructions when the line installation crew is scheduled for work.
5. The Company controls the initial and subsequent use of the trench and its backfill. At its option, certain other utilities, such as telephone, CATV and gas, may share the trench. However, water and sewer lines are not permitted to be placed in Company trenches.
6. The Customer shall provide all necessary excavating and backfilling and grading to the Company's underground construction standards and specifications. Such construction standards and specifications will be furnished by the Company on request. Final acceptance of the trench shall be determined by Company personnel prior to installation of Company facilities. If the Company's standards and specifications have not been met, such excavating and backfilling shall be corrected or redone by the Customer. Failure to comply with the Company's construction standards and specifications permits the Company to refuse service until such standards and specifications are met.
7. The Customer shall provide and install, conduit of size specified by the Company, including a 1/4 inch diameter nylon or polypropylene pulling rope, necessary for the Company to install its underground cable.
8. If the Customer changes the plot plan after installation of the Company's lines has begun, or otherwise necessitates additional costs by their act or failure to act, such additional costs shall be borne by the Customer.
9. The Customer shall request electric service in sufficient time so that underground lines may be installed before curbs, pavements and sidewalks are laid.
10. Should the Customer be unable to perform the provisions of Sections B.2, B.6 and/or B.7 on property not owned or controlled by the Customer, the Company may perform the applicable provisions at the Customer's expense.

LINE EXTENSION PLANS

SCHEDULE "LE"

C. Plan A - Residential Line Extension Plan - Primary or Secondary Line Extensions

The provisions of this plan shall apply to construction by the Company of single phase extensions to its distribution system to serve permanent single residential Customers, multi-family dwelling units and residential subdivisions. When an overhead or underground line extension is provided by the Company, the Customer shall pay the following charges. Such charges shall be divided proportionately according to the number of feet used among the Customers initially connected to such extension.

1. Residential Line Extensions less than or equal to 1,000 feet in length:

First 1,000 feet per Point of Service..... No Charge

2. Residential Line Extensions greater than 1,000 feet and less than or equal to 3,000 feet in length:

(a) Estimated annual net revenue is defined as the estimated annual gross revenue calculated in accordance with the Customer's applicable billing rate schedule, less the estimated annual revenue attributable to the ENEC, any revenue based taxes and any associated surcharge.

(b) If nine (9) times the Customer's estimated annual net revenue is greater than the Company's cost of providing 1,000 feet of residential line extension at an average cost per foot of \$5.55*, the Customer shall receive such excess as a credit toward the cost of an extension greater than 1,000 feet.

(c) Estimated annual net revenue shall be based upon the monthly average kilowatt-hour usage during the calendar year preceding the extension completion for the Customer's applicable billing rate code, unless circumstances of the Customer show this would result in significant error.

(d) The Customer's cost share of a residential line extension greater than 1,000 feet and less than or equal to 3,000 feet is \$5.00 /foot* times that portion of the extension that exceeds 1,000 feet plus applicable right-of-way clearing costs defined in section C.3. minus the applicant(s) total net revenue credit, if any, as determined by section C.2(a) through C.2(c).

*The Company will update these charges annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

3. Residential Line Extensions greater than 3000 feet:

Extensions which exceed 3,000 feet per Point of Service shall be calculated from the total estimated cost (excluding right-of-way clearing costs and the cost of facilities specified in Commission's Rule 5.6) of the entire line extension and applied to such portions beyond 3,000 feet. Such extensions shall be subject to the applicable per foot charge and credits set forth in Section C.2 for that portion of such extensions greater than 1,000 feet and less than or equal to 3,000 feet in length.

(N)

LINE EXTENSION PLANS

SCHEDULE "LE"

C. Plan A - Residential Line Extension Plan - Primary or Secondary Line Extensions (continued)

4. Right-of-Way Clearing

The Company, at its expense shall provide right-of-way clearing for the first 1,000 feet of line extension per Point of Service. For extensions in excess of 1,000 feet, the Customer shall have the option of providing the right-of-way clearing for that portion of the extension in excess of 1,000 feet. Customer-provided right-of-way clearing shall be performed to reasonable Company specifications. If the Customer elects to provide the right-of-way clearing in excess of 1,000 feet, the Customer charges indicated below shall not apply. Otherwise, the following charges shall apply based upon the actual footage to be cleared by the Company.

First 1,000 feet per Point of Service..... No Charge

Next 2,000 feet per Point of Service \$ 3.93 /foot*

Extensions which exceed 3,000 feet per Point of Service shall be calculated from the total estimated right-of-way clearing costs of the entire line extension and applied to such portions beyond 3,000 feet plus the per foot charge above applicable for that portion of such extensions greater than 1,000 feet and less than or equal to 3,000 feet in length.

*The Company will update these charges annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

5. Applicable charge(s) shall be paid by the Customer in advance of construction or, at the Customer's election, pay a monthly surcharge equal to 2.2% of the total charge. Such monthly surcharge shall be shown on the Customer's monthly bill for electric service and shall remain in effect for a term of five (5) years from the date the Customer first takes service. Customer's electing to pay a monthly surcharge shall agree to take service for not less than five (5) years and pay all related bills.

Applicable charge(s) shall be adjusted and refunds made as new Customers are connected to the extension between its original beginning and the original terminus within a five (5) year period. Each additional Customer whose service is connected to the original extension shall pay the applicable charge as provided herein, based on such Customer's proportionate use of the original extension plus the additional extension length required to serve such additional Customer. The charge then being paid by the Customers served from the original extension shall be reduced in proportion thereto, but in no event shall the aggregate refund made to any Customers exceed the total amount paid to date. New Customer additions which would result in an increase in the extension charges to the original Customer(s) will be treated as a separate extension subject to this schedule.

LINE EXTENSION PLANS

SCHEDULE "LE"

C. Plan A - Residential Line Extension Plan - Primary or Secondary Line Extensions (continued)

6. Overhead Service Drops and Underground Service Laterals:

First 125 feet per Point of Service..... No Charge

In excess of 125 feet per Point of Service \$ 1.51 /foot*

The above charge shall be paid by the Customer in advance of construction.

*The Company will update this charge annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

7. Alteration of Facilities

The cost of alterations to line facilities required to serve existing Customers due to relocation of the Company facilities caused by Customer construction or request shall be paid by the Customer. The Customer will not be charged for original facilities retained for such revised service. If an existing Customer's load increases, the Company shall make, if required, appropriate modifications to the individual service line at no cost to the Customer, provided the type of individual service line (overhead or underground) and the Point of Service remains the same. In the case of underground, the Customer shall be responsible for providing all trenching, conduit, backfilling and restoration required to make such alterations.

D. Plan B - Non-Residential Line Extension Plan

The provisions of this Plan shall apply to construction by the Company of single phase and/or three phase extensions to its distribution system to serve permanent non-residential Customers in accordance with the following terms and conditions.

1. The Company will install line extensions at its expense providing the total estimated installed cost of the extension (excluding the cost of facilities specified in Commission's Rule 5.6) to serve Customers does not exceed nine (9) times the Customer's estimated annual net revenue. Estimated annual net revenue is defined as the estimated annual gross revenue calculated in accordance with the Customer's applicable billing rate schedule, less the estimated annual revenue attributable to the ENEC, any revenue based taxes and any associated surcharge. If more than one Customer is to be served from the extension, the cost will be divided among the Customers in proportion to their electrical load and length of extension.
2. The Customer shall pay in advance of construction the amount by which the total estimated installed cost of the extension (excluding the cost of facilities specified in Commission's Rule 5.6) exceeds nine (9) times the estimated annual net revenue.

LINE EXTENSION PLANS

SCHEDULE "LE"

D. Plan B - Non-Residential Line Extension Plan (continued)

3. Limited term financing of construction advances is permitted providing that the financing is offered at reasonable terms and conditions in a non-discriminatory basis.
4. The Company may require a Customer to give evidence of permanence by paying the Company the cost of connection and disconnection as a safeguard for the Company's investment and a protection to its other Customers. The cost of connection and disconnection shall be the total estimated net installed cost of the required facilities, less the salvage value when removed, plus the cost of removal. This payment, less payments calculated in D.2. and/or D.5., will be returned to the Customer at the end of the agreed initial term with interest, provided the Customer has taken continuous service from the Company during those years. The payment covering the cost of connection and disconnection shall be forfeited to the Company and the facilities removed when a Customer does not take continuous service for the initial term. An Electric Service Agreement may be required.
5. Overhead Service Drops and Underground Service Laterals:

Single Phase

First 125 feet per Point of Service No Charge

In excess of 125 feet per Point of Service \$ 1.51 /foot*

Three Phase

First 125 feet per Point of Service No Charge

In excess of 125 feet per Point of Service \$ 2.50 /foot*

The above charge shall be paid by the Customer in advance of construction.

*The Company will update these charges annually based upon the average cost for such line extensions that occurred during the prior calendar year, and submit to the Commission for approval to be effective during the 12-month period beginning each April.

LINE EXTENSION PLANS

SCHEDULE "LE"

D. Plan B - Non-Residential Line Extension Plan (continued)

6. Repair or Replacement of Existing Facilities

(a) Upgrading Company-owned Facilities

When it becomes necessary due to increased load to upgrade Company-owned facilities to provide the Customer with adequate service, the Company shall replace such facilities and charge the Customer the estimated incremental net cost-to-serve which exceeds nine (9) times the Customer's estimated incremental annual net revenue. In the case of underground, the Customer shall be responsible for providing all trench, conduit, backfill and restoration required to make such alterations.

(b) Replacement of Deteriorated or Failed Company-owned Facilities

When it becomes necessary to repair or replace Company-owned facilities due to deterioration or failure, except when such is caused by the negligence of the Customer, their agents or employees, the Company shall repair or replace such facilities at no cost to the Customer. If caused by negligence of the Customer, their agents or employees, the Customer will pay the actual cost to repair or replace.

(c) Replacement or Relocation of Existing Useful Company-owned Facilities at Customer Request

The cost of alterations to Company-owned facilities required to serve an existing Customer caused by Customer construction or request shall be paid by the Customer. A credit for salvageable material will be applied in the cost allocation. The Customer will not be charged for original facilities retained for such revised service.

E. Temporary Service

1. Temporary service is available at the option of the Customer and is defined as service which is not intended to be permanent and is supplied on a month-to-month basis for the duration of the service at one point of delivery and measured through one meter. Service will be furnished only when and where Company has available sufficient capacity in lines, transformers, and generating equipment and at the voltage and phase of Company's distribution system most available.
2. Temporary service Customers will be required to pay all costs of installation and removal of Company facilities, including overheads, with credit being allowed for material salvage value. Payment of such cost and of the estimated bill for service may be required in advance. The Company may make such arrangements for financing its facilities as may be mutually agreed, provided that such arrangement are without preference to or discriminating against such Customer or other Customers of the Company.
