 in Case No. 99-1407-EG-PC, dated December 9, 1999

Issued: December 31, 2002

Issued by
 B. E. Walencyk
 Vice President

Effective: January 1, 2003

RULES AND REGULATIONS FOR ELECTRIC SERVICE

The following Rules and Regulations for Electric Service shall be deemed a part of each schedule of rates now or hereafter published by Monongahela Power Company and every contract for the furnishing of electric service by the Company shall be deemed to include all of the terms and conditions of these Rules and Regulations.

Rules and Regulations for Electric Service set forth hereinafter and the qualifications thereto by certain rate schedules are supplementary to the "Rules and Regulations for the Government of Electric Utilities" established by the Public Service Commission of West Virginia, and all amendments and modifications thereto hereinafter made by said Commission. Nothing in these supplementary Terms and Conditions shall be interpreted as divesting the Commission or any appropriate court of any of the jurisdiction delegated to it by law.

DEFINITIONS

Certain words when used in contracts, schedules, and Rules and Regulations for Electric Service of the Monongahela Power Company shall be understood to have the meaning set forth in this paragraph, viz:

(a) "Commission" -- the Public Service Commission of West Virginia.

(b) "Commission Rule" -- "Rules and Regulations for the Government of Electric Utilities" established by the Public Service Commission of West Virginia.

(c) "Company" is understood to mean the Monongahela Power Company.

(d) "Customer" is understood to mean any person, group of persons, firm, corporation, institution, municipality or other service body receiving and using electric service supplied by the Company through a service connection.

(e) "Month" is the period between two monthly meter readings, taken as nearly as practicable on the same date each calendar month as selected by the Company.

(f) "Operation" is understood to mean a single enterprise conducted by a customer where all of said enterprise is prosecuted as one unit.

(N) (g) "Point of Service": The point of connection between the Distribution System of the Company and the electric system of the Customer .

(C) (h) "Service" is understood to mean any electric energy or service which the Company may supply, or any duty or obligation which may be performed by it.

(C) (i) "Service Connection" is understood to mean each connection through which the Company furnishes any electric service to the customer.

1. CHARACTER OF ELECTRIC SERVICE

Unless otherwise specially agreed upon, the Company will furnish single or three-phase, sixty-cycle alternating current.

(C) Denotes Change

Issued by Authority of an Order
of the Public Service Commission of West Virginia
in Case No. 07-1170-E-T, dated December 30, 2008

Issued: February 12, 2009

Issued by
D. W. McDonald
Vice President

Effective: January 29, 2009

RULES AND REGULATIONS FOR ELECTRIC SERVICE

2. APPLICATION

(a) A copy of the rates, and Rules and Regulations under which service is to be rendered will be furnished to the customer upon request. The Company will provide an explanation of rates in accordance with Commission Rule 4.1(2).

(b) A written application may be required from each customer under the rates so selected by him, which application, when duly accepted by the Company, shall constitute a contract between the customer and the Company. Use of electric service shall obligate the consumer to pay for the service used regardless of whether an application has been made and signed.

(c) An Electric Service Agreement when properly executed on the part of the Company and customer will constitute a contract between the customer and the Company.

(d) Customers desiring service shall make application to the office of the Company before commencing the use of the service, and will be charged for all service rendered from and including the day of commencing such use. A contract for electric service is not transferrable without written consent of the Company. The customer shall give the Company three days written notice, unless otherwise provided for, in advance of intended discontinuance of service and/or removal from the premises, and in the event of failure to do so will be liable for payment for all service rendered up to the time the Company receives notice of the customer's discontinuance of service. Requests to commence or discontinue service made by telephone will be honored unless, at the time of the telephone request, the Company representative specifically advises the customer to make such request in writing.

3. DEPOSITS

(C) The Company may require any applicant or customer to make a deposit with the Company initially and from time-to-time as a guarantee of payment for electric service used. Residential customer deposits required after March 12, 1983 shall not exceed one-twelfth (1/12) of the customer's estimated annual charge. Nonresidential customer deposits required after March 12, 1983 shall not exceed one-sixth (1/6) of the customer's estimated annual charge. The Company shall not be required to supply electricity until the deposit has been paid, and it may terminate service if the deposit or any increase thereof is not paid when required. After a customer has paid bills for service without a delinquency for a period of twelve (12) consecutive months, the Company shall promptly refund any deposit made by such customer prior to such period plus accrued interest thereon. Simple interest will be paid at the end of said period or at the day of discontinuance of service on any deposit which had remained with the Company for a period of six months or longer. Such interest shall be equal to the average one-year treasury constant maturities for September, October and November of the preceding year (rounded to the nearest ½ percent) in effect at the time the deposit is refunded. For purposes of this Rule, calculation of the twelve consecutive months period shall commence from the first regular payment or, in the event of payment of a delinquent bill, from such latter date. The Company shall have a reasonable time in which to read and remove its meters and to ascertain that the obligations of the customer have been fully performed before refunding any deposit.

(C) Denotes Change

Issued by Authority of an Order
of the Public Service Commission of West Virginia
in Case Nos. 06-0960-E-42T and 06-1426-E-D, dated May 22, 2007

RULES AND REGULATIONS FOR ELECTRIC SERVICE

4. RIGHT-OF-WAY

The facilities of the Company by which service shall be furnished to the customer shall be located on or over easements which shall provide a route deemed by the Company to be the most suitable for the furnishing of such service. In consideration of the furnishing of service by the Company, the customer shall cause such rights and easements to be provided the Company on or within property to be served as the Company shall deem necessary and convenient to permit the construction, operation and maintenance of the Company's facilities required to serve the customer. It shall not be the obligation of the Company to acquire any right or easement on or over property of another necessary for the furnishing of service to the customer for which acquisition the Company does not have the right of eminent domain.

5. SERVICE CONNECTIONS

- (O) The Company will make the necessary connection from its lines to the wire entrance of the customer's building, which connection is
(O) to be placed at a location harmless to the public and convenient to the lines of the Company. The Company shall not be obligated to connect service to be used in or in connection with a building or structure located in whole or in part on any property or easement of the Company.

6. METER CONNECTIONS

The Company will furnish and connect the necessary metering apparatus for measuring service to the customer. The customer is to provide a suitable meter location so the meter may be conveniently read, inspected and tested. Prior to connection of service by the Company, the customer shall furnish and install, and shall thereafter maintain at all times, a ground connection in compliance with the requirements of the National Electrical Code as the same may be amended from time to time.

7. CUSTOMER'S RESPONSIBILITIES

(a) The Company is in no way responsible for damages arising from any error or defect in wiring of the customer. All wiring is to be in accordance with the regulations of the National Electrical Code or any state or municipal authority having jurisdiction.

(b) The Company shall have the right at all reasonable hours to enter the premises of the customer for the purpose of installing, removing, reading, testing, replacing or otherwise disposing of its apparatus and property, and the right of entire removal of the Company's property in the event of the termination of the contract for any cause.

(O) Denotes Omission

Issued by Authority of an Order
of the Public Service Commission of West Virginia
in Case No. 07-1170-E-T, dated December 30, 2008

Issued: February 12, 2009

Issued by
D. W. McDonald
Vice President

Effective: January 29, 2009

RULES AND REGULATIONS FOR ELECTRIC SERVICE

(c) The customer is to install only such motors or other apparatus or appliances as are suitable for operation with the specific character of service supplied by the Company, and which will not be detrimental to same and the electric service is not to be used in such a manner as to cause unprovided-for voltage fluctuations or disturbances in the Company's distribution system. The Company will be the judge as to the suitability of apparatus or appliances to be connected to its lines, and as to whether the operation of such apparatus or appliances will be detrimental to its general service; subject to determination by the Public Service Commission of West Virginia in case of controversy.

(d) A customer shall not increase its power requirements to exceed the service capacity for which customer contracts without the prior written consent of the Company. If the Company consents to any such increase, said service capacity shall be increased to an amount equal to the increased power requirements to which the Company so consented. Should the customer increase its power requirements above the amount of power requirement contracted for or the amount of power requirement consented to by the Company, the customer shall be responsible for, and indemnify the Company against, any losses, damages or injuries sustained by the Company or others resulting therefrom, and all claims therefor.

8. NO RESALE

It is expressly understood and agreed that the electric service to be delivered by the Company to the customer is not to be resold for any purpose unless the customer is engaged in the business of distributing electric energy as a public utility.

9. BILLING AND PAYMENTS

(C) (a) Bills for service will be rendered by the Company to the customer at regular intervals of one month in accordance with the rate selected applicable to the customer's service. When meters are read at intervals of more than one month, bills for the initial months of the interval may be estimated based upon a reasonable process that includes weather as a factor. The bill for the final month of the interval will be calculated from the metered use during the interval corrected for the amount of estimated use previously billed. Bills are payable at the main office or any of the collection offices of the Company, or other places designated by the Company. Customers not receiving their bills at the usual time should make inquiry of the Company in order to avoid a late payment charge as the Company does not permit an extension of the payment period because of the failure to receive the bill. When payment of a bill is sent by United States mail, the late payment charge will be avoided if that such payment contains a legible postmark as evidence that payment was mailed on or previous to the last day of the payment period. In the absence of such postmark, a bill will be considered paid on the date of its receipt by the Company.

(b) In the event of the stoppage of a meter or the failure to register the correct amount of current consumed by reason of either a fast or a slow meter, the customer will be billed or refunded for such period in accordance with Commission Rule 4.4 - Adjustment of Bills or Rule 3.1(3) - Waste or Fraud.

Effective: May 23, 2007

RULES AND REGULATIONS FOR ELECTRIC SERVICE

- (C) (c) Permanent residential nonseasonal customers may elect to pay their bills under the Company's Average Payment Plan. The Average Payment Plan provides for bills to be rendered monthly based upon 1/12 of the customer's latest twelve months' usage. If there is no twelve-month usage history available for the customer, then an estimated amount will be used. Any difference between the average payments and the actual charges for the twelve-month average payment period at its anniversary will be amortized over the next twelve-month period. If a participant in the Average Payment Plan fails to make two or more consecutive monthly payments, the Company shall have the option of terminating that customer's participation in the plan.

Nonresidential customers who are billed under the Uniform Payment (Budget) Plan on the effective date hereof may continue to be billed under the Uniform Payment (Budget) Plan or may elect to be billed based on actual usage.

- (C) (d) Company may, at its option, read meters and compute bills in units of ten kilowatt-hours for residential and small commercial customers, and in units of ten kilowatt-hours or larger where required by meter design or use of instrument transformers.
- (C) (e) The Company will only accept Customer-supplied meter readings at the end of each initial month of a meter reading interval longer than one month by telephone, through the Company's internet website, or by meter dial card which will be supplied to the Customer upon request. If the Customer-supplied reading is received by the Company during the three days immediately preceding the scheduled read date of such month, the bill for such month will be computed from the Customer-supplied meter reading instead of by estimate. The Company will adjust estimates of bills for changes in conditions of which it has been notified in advance by a Customer.
- (C) (f) All rates of the Company for electric service are subject to the approval of the West Virginia Public Service Commission and may be changed from time to time as approved by such Commission or as otherwise permitted by law.
- (C) (g) The Company's Bill Extender Program is available on application to residential customers receiving monthly Federal Retirement, State Retirement, Railroad Retirement, or Social Security benefits. Under the Bill Extender Program, bills dated after the fourth day of each month will not become past-due until the fifth day of the following month, but in no case less than 20 days from the date billed. By choosing the Bill Extender Program, the customer agrees to pay bills monthly under the Average Payment Plan described in Section 9, Paragraph (c) of these Rules and Regulations.
- (C) (h) The Company may, after notice to the Commission in each case, require weekly or bi-weekly payment for service by a nonresidential customer in unusual situations when the Company, upon investigation, believes the customer's ability to pay for service may be impaired and that a shortened payment period is necessary to protect the Company and its other customers from loss.
- (C) (i) If the Company receives a negotiable instrument from an Applicant or Customer as payment of any bill, charge, or deposit due, and if such instrument (including electronic payment) is subsequently dishonored or is uncollectible for any reason, the Company may charge the Applicant or Customer a processing fee of Fifteen Dollars (\$15.00) or the actual processing fee incurred by the Company, whichever is less.
- (C) (j) Final billed accounts with credit balances of less than \$1.00 shall be refunded only upon request of the Customer.

10. SUSPENSION OF MINIMUM MONTHLY PAYMENT

Should the customer be prevented from receiving during any period all or any portion of the electric service contracted to be furnished, by reason of fire, explosion, flood, riot, or

(C) Denotes Change

Effective: May 23, 2007

RULES AND REGULATIONS FOR ELECTRIC SERVICE

- (O) war, then the applicable minimum monthly payment required for such period may, upon written application by the customer, be suspended, but such suspension shall not exceed three months during any contract year.
- (N) Should the customer be prevented from receiving, for seven consecutive days or more, all or any portion of the electric service contracted or agreed to be furnished due to the failure or inability of the Company to deliver such service, then the minimum charge shall be waived for that monthly billing period.

11. FAILURE TO PAY

- (C) If the customer shall fail to make payment for any service rendered by the Company after payment is due, the Company shall have the right either (1) to cancel the service contract-in which event the minimum payments as provided in the schedule for the unexpired term of the contract shall thereupon become payable to the Company as liquidated damages-or, (2) at the Company's option, to discontinue service
- (C) until all payments due from the customer shall have been made. However, any customer which has been assessed liquidated damages pursuant to option (1) shall be entitled to a credit or refund for a pro rata portion of such liquidated damages if the customer is reconnected during the unexpired term of the contract, or if a new customer is connected at the same location. The proration herein provided shall consider both the number of months remaining to the end of the contract of the customer paying the liquidated damages and the minimum bill established for the reconnected or new customer.

12. EMERGENCIES

The Company will use reasonable diligence in furnishing continuous electric service, but the Company shall not be liable for any loss, damage or expense sustained by the customer caused by interruption, deficiency, variation or other failure of electric services caused by any acts of God, public enemies, accidents, fuel shortages, labor disputes, riots, wars, orders or acts of civil or military authority, breakdowns of or damage to equipment or facilities of the Company, or any cause other than gross negligence or willful neglect on the part of the Company.

The Company may, without liability therefor, interrupt or suspend service to any or all of its customers whenever, in its sole judgment, such action is required to limit or prevent any actual or threatened disturbance or instability on the electric system of the Company or any interconnected system.

13. INTERRUPTION AND DISCONTINUANCE OF SERVICE

The Company reserves the right to shut off the supply of electric service for any of the following reasons: (1) repair, maintenance, alteration, or extension of Company facilities; (2) enforcement of air quality, water quality or other environmental standards; (3) fraudulent representation or other illegal act by customer in the procurement, use or measurement of

- (C) Denotes Change
(O) Denotes Omission
(N) Denotes New

RULES AND REGULATIONS FOR ELECTRIC SERVICE

electric service; (4) use of electric service in violation of these Rules and Regulations; (5) any disapproval by Company of the customer's equipment or installation by virtue of its being or becoming defective or otherwise unsafe or objectionable; (6) customer's premises have been abandoned or are in such condition as to create a hazard to service facilities or to persons on or about such premises; (7) placement or maintenance by customer of any building or structure which in the opinion of the Company constitutes a hazard to service facilities or to persons; (8) flooding or threatened flooding of customer's premises constitutes a hazard to service facilities or to persons; (9) failure by customer to comply with the requirements of the National Electrical Code; (10) nonpayment of any bill, as herein provided; (11) customer's violation of or non-compliance with any Rule or Regulation of or on file with the Commission; (12) whenever such action is necessary to protect the Company from fraud, theft or abuse; (13) upon cancellation of service contract by the Company; or (14) at the request of the customer.

Customers whose service is scheduled for disconnection for reasons (3), (4), (10), (11), (12) and (13) shall be notified in writing by mail or delivery to the service location by the Company not less than ten days before such disconnection and, unless the Company reasonably concludes that the premise is not permanently inhabited, the Company shall make a personal contact, face-to-face or by telephone, with the customer or an adult member of the household not less than twenty-four hours before such disconnection. The customer may notify the Company prior to the date of scheduled disconnection that (a) a portion of the bill is in dispute, (b) the customer is being charged for service not rendered, (c) any information resulting in the Company's decision to discontinue service is erroneous, or (d) that the customer is unable to pay for such service in accordance with the requirements of the Company's billing or is able to pay for such service but only in installments, and that termination of service would be especially dangerous to the health or safety of a member of the customer's household. Upon such notification, the Company shall provide the customer with an opportunity to present such complaint to an employee authorized to resolve the dispute. The customer shall have seven days to appeal the Company's decision to the Commission. Any amount not in dispute must be paid by the customer in order to protect his rights. Reason (d) above shall not entitle nonresidential customers to delay of scheduled termination of service. The Company may request a waiver from the Commission where operation of a provision of Rule 4.8 of the Commission's Rules and Regulations for the Government of Electric Utilities will result in undue hardship to the Company. The Company shall keep a record of the conditions resulting in termination for reasons (5), (6), (7) and (9), shall inform the customer of the conditions necessary for restoration of service and shall make a reasonable effort to notify the customer prior to termination. The Company may terminate service without notice when, absent such termination, a condition hazardous to life or property would exist.

(N) The employees of the Company shall not be required to accept payments at the Customer's premises in lieu of disconnecting service for non-payment. In lieu of payments being tendered at a Customer's premise, a Customer shall be afforded no less than one (1) hour in which to remit payment using an authorized electronic payment service or at authorized collection agencies of the Company. If the Customer fails to make the required payment, the Company may proceed to disconnect service.

RECONNECTION CHARGE

When the service has been discontinued for any of said reasons other than (1), (2) and (8), a charge to the customer, payable before reconnection, will be made. When service has been discontinued at the customer's request, however, the reconnection charge shall apply only when the customer requests that service be reconnected at the same location within eight (8) months from the date that service was disconnected. The reconnection charges are as follows:

RULES AND REGULATIONS FOR ELECTRIC SERVICE

Straight time (normal working hours).....	\$17.50
Overtime - Callout evenings or Saturdays.....	57.50
Overtime - Callout Sundays.....	72.50
Overtime - Callout Holidays.....	87.50

If an installment payment plan for the payment of a customer's delinquency is appropriate, the requirement for the advance payment of the reconnection fee shall not apply and any reconnection fee may be a part of such installment payment plan.

Absent a bona fide emergency, the Company shall not be required to make reconnection of service after dark, pursuant to a waiver of Commission Rule 4.8.1.a.F.

INTERRUPTION OF SERVICE

If service is interrupted for reasons (1) and (2) for any long duration, Company shall notify, insofar as is practical, every customer affected by such interruption. Company shall not be required to give such notice for interruptions due to emergencies, accidents, the elements, public enemies, strikes or orders of court, governmental commissions or agencies which are beyond the control of the utility.

14. CANCELLATION OF CONTRACT

In case of any act of receivership or bankruptcy by or against the customer, the contract shall, at the option of the Company, cease and terminate, and all claims for service previously delivered shall become forthwith due and payable.

15. EXTENSION OF COMPANY'S FACILITIES

RULES AND REGULATIONS FOR ELECTRIC SERVICE

16. PROMISES

No inspector, agent or other employee of the Company has authority to make any promises, agreements or representations not included in the rate schedules, Rules and Regulations, and form of contract on file with the Public Service Commission.

17. SERVICE FOR PERIODS LESS THAN THOSE SPECIFIED IN RATE SCHEDULES

A. Initial Term

A new customer taking service at the location of a previous customer shall be responsible for an initial term contract that is no longer than the remaining term of the previous customer's contract. Provided, however, that should the Company be required to make an investment in permanent facilities to serve the new customer, this provision may be subject to modification, or conditioned upon an appropriate agreement to assure reasonable compensation for such investment.

(O)
(C)

B. Governmental Bodies and Agencies

When a governmental body or agency is prohibited by law from entering into an agreement for the term specified by an otherwise applicable rate schedule, the Company will accept an agreement with such governmental body or agency under such rate schedule for less than the term specified therein, but in no case less than one year, provided that said agreement shall

RULES AND REGULATIONS FOR ELECTRIC SERVICE

continue in force thereafter for successive periods of like term until written notice of cancellation has been given by either party to the other twelve (12) months prior to any expiration date and such time has expired, and further provided, in the Company's opinion, the use of service under such agreement can be expected to continue for not less than the minimum term specified by the applicable rate schedule.

18. LOCAL TAX ADJUSTMENT

When the Company is or becomes liable to any municipal corporation, or other tax levying corporation, or political subdivision of the State, for any license tax, excise tax, privilege tax, use tax, franchise fee or tax, or other like tax, based upon the amount of electric service sold or revenues received by the Company within the territorial limits of such corporation or political subdivision, or based upon the number of poles, meters or other utility property units owned or used by the Company within such territorial limits; or for any other tax, fee or service charge, which other tax, fee or service charge is not imposed upon all other businesses at substantially the same rate; then the amount of such tax, fee or charge shall be added, pro rata, to the bills to customers of the Company for electric service rendered within such territorial limits, including compensation for the additional state gross receipts tax resulting therefrom; provided however, that a franchise fee or franchise tax based upon the number of poles owned or used by the Company within such territorial limits shall not be so added to the bills of customers when such fee or tax is not in excess of one dollar (\$1.00) per pole per year.

- (N) Adjustments in bills will be made by adding to each bill, as determined by application of the appropriate rate schedule, a local tax surcharge computed as a fraction of such bill. Whenever the local and/or state tax is levied as a percentage of revenues, the fraction to be added shall be calculated by dividing the local tax rate, expressed as a decimal, by one minus the sum of the local and state tax rates, both expressed as decimals.

There is first filed, coincidentally with the filing of this Rule, a statement (see Sheet No. 5A) showing a list of cities and towns levying taxes subject to this Rule, and the local tax surcharge, expressed as a decimal fraction, which will be added to the bills to customers in order to compensate for such taxes. Whenever a change or changes occur in such tax rates, a revised statement will be filed with the Commission as soon as practicable after the Company has been notified that such new or changed rates will be applied.

19. IMPOSED RELOCATIONS OR UNDERGROUNDING

- (N) When Company is required by any political subdivision of the State or the United States, or any agency thereof, to place new facilities underground, or to relocate existing facilities underground, or to otherwise relocate existing facilities, and the Company has not been otherwise compensated, the cost of such placement or relocation shall be recovered by Company in the manner hereinafter provided.

- (N) Denotes New

RULES AND REGULATIONS FOR ELECTRIC SERVICE

The political subdivision or agency which imposes the requirement for relocation or undergrounding should pay the adjusted cost thereof in advance. In the absence of such payment, Company may recover, within a period of five years, such adjusted cost by means of a surcharge applied upon the bills of all customers whose electric service delivery points are situated within the political subdivision.

(N) 20. COMPLAINT (ELECTRIC RULE 6.7.) and REQUEST (ELECTRIC RULE 6.8.) METER TESTS

(a) The Company shall provide one free meter test during any 24 month period for any Customer requesting same. For each additional test requested during such period, the Customer shall be required to deposit with the Company a deposit of \$30.00 for a single-phase meter or \$35.00 for a poly-phase meter to offset the cost of such test. If any such additional meter test made during the aforesaid period reveals meter registration that is greater than 102%, the deposit required herein shall be refunded; otherwise, the deposit shall be retained by the Company to offset the cost of such test.

(b) Should the meter test be performed pursuant to Commission Electric Rule 6.7. Complaint Test, the Company will test the meter at the direction of a Commission representative.

(c) For either type of test, the Customer, or his representative, may be present when the meter is tested.

(d) A written report of the results of the test shall be made to the Customer within 10 days after completion of the test. The complete original records of the test shall be kept on file by the Company for a period of 5 years.

(e) If, as a result of any test, the meter is found to be in error by more than 2%, or not registering, billing adjustments will be made pursuant to Commission Rule 4.4. Adjustment of Bills.
